

ORDINANCE NO. 2010-032

(Columbia Renaissance Redevelopment Plan)

AN ORDINANCE APPROVING THE COLUMBIA RENAISSANCE REDEVELOPMENT PLAN OF THE CITY OF COLUMBIA, SOUTH CAROLINA; DESIGNATING SUCH AREA AS A REDEVELOPMENT PROJECT AREA; MAKING FINDINGS OF BLIGHT WITHIN THE REDEVELOPMENT PROJECT AREA AND OTHER FINDINGS CONTEMPLATED BY THE TAX INCREMENT FINANCING LAW; DESIGNATING REDEVELOPMENT PROJECTS; AND OTHER MATTERS RELATING THERETO.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF COLUMBIA, SOUTH CAROLINA, AS FOLLOWS:

Section 1. Findings and Determinations of Council. The City Council (the "Council") of the City of Columbia, South Carolina (the "City"), hereby finds and determines:

(a) The City is an incorporated municipality located in portions of Richland County, South Carolina, and Lexington County, South Carolina, and as such has all powers granted to municipalities by the Constitution and general laws of this State.

(b) Pursuant to Section 5-5-10, Code of Laws of South Carolina 1976, as amended (the "S.C. Code"), the City has selected the Council-Manager form of government and is governed by a Council composed of a Mayor and six (6) Council members which constitute the governing body of the City.

(c) Pursuant to Sections 31-6-10 to 31-6-120, inclusive (being the "Tax Increment Financing Law" and herein referred to as the "Act"), of the S.C. Code, the governing bodies of incorporated municipalities are vested with all powers consistent with the South Carolina Constitution necessary, useful, and desirable to enable them to accomplish redevelopment in areas which are or threatened to become blighted.

(d) The City has caused to be prepared a redevelopment plan (within the meaning of the Act) entitled: "Columbia Renaissance Redevelopment Plan" (the "Redevelopment Plan"), which contains (among other things) a statement of the objectives of the City with regard to the Redevelopment Plan and provides a comprehensive program of the City for the redevelopment of the area of the City described therein and as described and designated in Section 3 of this Ordinance and *Appendix B* to the Redevelopment Plan (such area being hereinafter referred to as the "Redevelopment Project Area").

(e) The Redevelopment Plan contains such information as may be required by the Act to be included therein, including but not limited to estimated redevelopment project costs

(within the meaning of the Act) (the "Costs"), the anticipated sources of funds to pay the Costs of the redevelopment projects (within the meaning of the Act) contemplated by the Redevelopment Plan (the "Redevelopment Projects"), the nature and term of any obligations to be issued, the most recently equalized assessed valuation of the Redevelopment Project Area, an estimate as to the equalized assessed valuation after redevelopment, and the general land uses to apply in the Redevelopment Project Area.

(f) Pursuant to the Redevelopment Plan, the estimated Costs of the Redevelopment Projects are \$40 million. The Redevelopment Plan contemplates the issuance by the City of not exceeding \$40 million of its tax increment bonds, to be issued from time to time as permitted by the Act (the "Tax Increment Bonds"), and the use of the proceeds of such Tax Increment Bonds, together with other sources of available funds (including but not limited to loans, grants and incremental tax revenues) as described therein, to defray all or a portion of the Costs of Redevelopment Projects. Based on certain projections of the City and the assumptions and qualifications described in the Redevelopment Plan, the aggregate tax increments of the City and the Taxing Districts (excluding the City) in the Redevelopment Project Area during the duration of the Redevelopment Plan have been estimated to be approximately \$28 million and \$90 million, respectively, for an aggregate total of \$118 million. There is a need for the proceeds of the Tax Increment Bonds, together with other sources of available funds, to be used for such purposes in the manner described in or contemplated by the Redevelopment Plan. Reference is made to the Redevelopment Plan for more detailed information relating to the matters described in this paragraph.

(g) On December 18, 2009, the City distributed copies of the Redevelopment Plan to all taxing districts (within the meaning of the Act) of which taxable property is included in the Redevelopment Project Area (collectively, the "Taxing Districts"), together with notices advising such Taxing Districts of a public hearing scheduled to be held by the City on February 4, 2010, relating to the Redevelopment Plan. The public hearing was held on February 4, 2010, following publication of notice thereof in *The State* on January 14, 2010.

(h) It is necessary and in the best interest of the City for the Council to approve the Redevelopment Plan, to make such statements, findings and determinations as may be required pursuant to Section 31-6-80 of the Act and to designate the Redevelopment Project Area as a "redevelopment project area" for purposes of the Act.

Section 2. Approval of the Redevelopment Plan. The Council hereby approves the Redevelopment Plan, in the form attached hereto as Exhibit A.

Section 3. Real Property in the Redevelopment Project Area. The Council hereby approves the list of all real property in the Redevelopment Project Area attached as Appendix B to the Redevelopment Plan, and designates such area as a "redevelopment project area" for purposes of the Act.

Section 4. Findings of Blighted Conditions, Future Static or Declining Property Values and Benefit of Redevelopment.

(a) The Redevelopment Plan describes in detail conditions of blight present with respect to the Redevelopment Project Area. Specific conditions of blight described in the Redevelopment Plan are evidenced by the following: age, dilapidation, obsolescence, deterioration, depreciation of physical maintenance/condition, lack of community planning, excessive vacancies, deleterious land use and layout, static or declining land values, lack of transportation infrastructure, lack of water, sewer and storm drainage infrastructure, and other conditions detrimental to public safety, health or welfare.

(b) As further described in the Redevelopment Plan, taxable real property values in the Redevelopment Project Area are significantly depressed compared to other areas of the City and, even where property values have increased, such values have not risen in recent years at a pace consistent with increases of other taxable real property within the entire City limits.

(c) To remove and alleviate blighted conditions, it is necessary to encourage private investment and enhance the tax base of the City and the Taxing Districts by the redevelopment of the Redevelopment Project Area, by the Redevelopment Projects described in the Redevelopment Plan, which objectives are herein declared to be essential to the public interest of the City and its citizens.

(d) In light of the foregoing and the information described in the Redevelopment Plan, the Council hereby finds and confirms the findings contained in the Redevelopment Plan that (1) the Redevelopment Project Area constitutes a "blighted area" and a "conservation area" within the meaning of Section 31-6-30 of the Act, (2) further private initiatives are unlikely to alleviate these conditions without public intervention, (3) property values in the Redevelopment Project Area would remain static or decline without substantial public assistance, and (4) redevelopment of the Redevelopment Project Area is in the interest of the health, safety, and general welfare of the citizens of the City.

Section 5. Duration of Redevelopment Plan. The duration of the Redevelopment Plan shall be 25 years from the date of enactment of this Ordinance (the "Plan Duration"). The maximum estimated term of the Tax Increment Bonds will not extend beyond the earlier of (a) the date which is 25 years after the date of issuance of such bonds or (b) the Plan Duration.

Section 6. Impact of Redevelopment Plan on Taxing Districts. The Council hereby determines that any adverse impact caused by the Redevelopment Plan upon the revenues of the Taxing Districts (consisting of Richland County, School District No. 1 of Richland County, the Richland-Lexington Airport District and the Richland-Lexington Riverbanks Park District) or the City, resulting from the application of projected incremental tax revenues for purposes described in the Redevelopment Plan (e.g., payment of debt service on Tax Increment Bonds or for budgeted Redevelopment Project Costs), is likely to be minimal. As further described in the Redevelopment Plan, the City expects the maximum impact on the Taxing Districts to range from 0.68% to 1.89%

of projected budgets, subject to the assumptions and qualifications set forth in the Redevelopment Plan. The Council furthermore determines that the long-term impact on the Taxing Districts of the Redevelopment Plan will be beneficial following the inducement by the City of substantial private investment in the Redevelopment Project Area as a result of the initiatives undertaken pursuant to the Redevelopment Plan, inasmuch as the Taxing Districts would not likely derive the benefits of increased property values (and increased assessed value base) without the implementation of the Redevelopment Plan, and all such Taxing Districts benefit from the removal of blighted conditions.

Section 7. Notice of Adoption of Ordinance. The Council hereby authorizes the publication of the Notice regarding the adoption of this Ordinance in *The State* in accordance with Section 31-6-80 of the S.C. Code. Such notice shall be in substantially the form set forth in Exhibit B hereof.

Section 8. Repeal of Conflicting Ordinances. All ordinances or parts of ordinances inconsistent with this Ordinance are hereby repealed to the extent of such inconsistency.

Section 9. Ordinance in Full Force and Effect. This Ordinance shall be in full force and effect from and after its enactment as provided by law. This Ordinance shall be forthwith codified in the Code of City Ordinances in the manner required by law and shall be indexed under the general heading "Columbia Renaissance Redevelopment Plan – 2010," and shall be made available for public inspection at the office of the Clerk of the City.

INTRODUCTION

As further described in this redevelopment plan (the Redevelopment Plan), the City of Columbia has engaged various studies and development plans covering areas within its municipal limits and determined that public improvements are needed and necessary to stimulate private investment in areas that are designated as blighted and/or conservation areas. The purpose of this Redevelopment Plan is to describe and define the boundaries of the Columbia Renaissance Redevelopment District (CRRD or District) which is an overlaying district for two master plans, establish the CRRD as a blighted or conservation area within the meaning of Title 31, Chapter 6, Code of Laws of South Carolina 1976, as amended (the TIF Act), and describe the City's objectives and comprehensive program for redevelopment of such area.

By implementing the proposed CRRD plan, the City will position itself with an opportunity to address and diminish the blighting influences within the District by 1) identifying strategic economic development opportunities, 2) insuring adequate infrastructure for current and future development exists, 3) promoting diverse residential development, 4) encouraging context sensitive development, 5) preserving open space, 6) preserving and enhancing community character and 7) encouraging multi-modal transportation.

At the conclusion of this period, the CRRD will redefine the North Columbia and East Central Columbia's unique aspects of development, market risk, infrastructure burdens and project subsidies and, in return, provide both land developers and local government a playing field that can be a win-win situation.

CHAPTER 1 – DESCRIPTION OF THE COLUMBIA RENAISSANCE REDEVELOPMENT DISTRICT

1.1. Overview of District

The Columbia Renaissance Redevelopment District (CRRD), as shown in Figure 1.1, is approximately 3,664 acres (5.7 square miles) in area. The general boundaries of the CRRD are Bull Street and North Main Street on the western and northern sides, including Farrow Road and Two Notch Road on the eastern boundaries, and Gervais Street on the southern boundary, more specifically described in “Specific Boundaries of the CRRD” below.

The CRRD incorporates three sub-areas, two previously described in prior redevelopment plans (the East Central City Plan, and the Villages of North Columbia Plan), one described in a master plan (Bull Street), plus areas not covered under the three previous plans. The locations of the geographic areas covered by the three previous plans are shown in Figure 1.2 along with the district boundary for the CRRD.

The CRRD is an urbanized area with a mix of residential, commercial, industrial, civic and institutional uses. Many of the Columbia areas major transportation corridors run through the Area including Blossom Street, Gervais Street, Taylor Street, Forest Drive, Millwood Avenue, Two Notch Road, Farrow Road, North Main Street, Beltline Boulevard and Sunset Boulevard.

Residential

While residential development occurs throughout the District, most of the residential development is located to the north and the east. The District encompasses primarily first and second ring subdivisions characterized by small houses on small lots. There has been some infill development including both single family neighborhoods and multi-family developments.

Commercial

Commercial development is concentrated along the major transportation corridors. These corridors are auto-intensive in nature with little or no pedestrian accommodations. The commercial activities along the corridor cater to the automobile. Typical uses are gasoline stations, auto repair, fast food restaurants and convenience stores. Shopping centers have large parking lots along the road. There are many marginal or vacant structures resulting from commercial development, typically retail, leaving the corridor moving further out to the suburbs. The commercial uses that remain do not meet the needs of the nearby residential development.

Industrial

There is very little industrial development remaining in the District, as a result, the remaining industrial activity is usually incompatible with its surroundings.

Specific Boundaries of the CRRD

From Elmwood Drive and Main Street intersection: North on North Main to River Drive. Northwest on River Drive to Beaufort Street. North on Beaufort Street straight through Earlewood Park to the intersection of North Main Street and Parkside Drive. West on Parkside Drive to Coles Road. Straight North on Coles Road through Lincoln Park to the intersection of Lamar Street and Jackson Avenue. Straight East on Jackson Avenue continuing to North Main Street. North on North Main Street to Frye Road. East on Frye Road to Eddy Street. South on Eddy Street to Farmview Street. West on Farmview Street to Koon Road. South on Koon Road to Prescott Road. Northwest on Prescott Road to Colonial Drive. South on Colonial Drive to Oakland Avenue. Northwest on Oakland Avenue to Holmes Avenue. Southwest on Holmes Avenue to Standish Street. South on Standish Street to Mauldin Avenue. Northwest on Mauldin Avenue to Ashley Street. Straight southeast on Ashley Street to Covair Street. Southeast on Covair Street to Madera Drive. Straight northeast on Madera Drive continuing up to Van St. Tarragon Drive. Northwest on Van St. Tarragon Drive to the end of the road. Northwest from the end of Van St. Tarragon Road straight up to Ames Road. Northeast on Ames Road to Frye Road and Farrow Road intersection. East from the Frye Road and Farrow Road intersection to the Norfolk Southern Railroad tracks. Continue southwest along the Norfolk Southern railroad tracks to the Truman Street and Scurry Street intersection. West on Truman Street to Windover Street. East on Windover Street to Two Notch Road. Northwest on Two Notch Road to Carter Street. Straight south from Two Notch Road and Carter Street intersection to Dubard Street and North Beltline Blvd. Straight south from the intersection of Dubard Street and North Beltline Boulevard connecting to the intersection of Pinehurst Road and Sheryl Lane. South from the Pinehurst Road and Sheryl Lane intersection to Harrison Road. West on Harrison Road to Center Street. South on Center Street to School House Road. East on School House Road to Pinehurst Road. South on Pinehurst Road to Forest Drive. West on Forest Drive to Westminster Drive. South on Westminster Drive to King Street. South on King Street to Senate Street. West on Senate Street to House Street. South on House Street to Bratton Street. East on Bratton Street to Woodrow Street. South on Woodrow Street to Cherry Street. Northwest on Cherry Street to Santee Avenue. South on Santee Avenue to Queen Street. Northwest on Queen Street continuing to the intersection of Stark Street and Short Street. Southwest on Stark Street to Heidt Street. North on Heidt Street to Senate Street. West on Senate Street to Pine Street. South on Pine Street continuing through Martin Luther King Jr. Park to the intersection of Lee Street and Santee Avenue. West from the intersection of Lee Street and Santee Avenue to Pavillion Avenue. North on Pavillion Avenue to College Street. Straight west on College Street to the intersection of College Street and Laurens Street. North on Laurens Street continuing to Gervais Street. West on Gervais Street to Bull Street. North on Bull Street to Colonial Drive. East on Colonial Drive to Harden Street. West on Harden Street to Bull Street. North on Bull Street to the intersection of Interstate 277 and Sunset Drive. West on Sunset Drive to North Main Street. South on North Main Street continuing straight to the intersection of Sumter Street and Grace Street. South on Sumter Street to Elmwood Avenue. West on Elmwood Avenue to Main Street.

Figure 1.1: Map of District

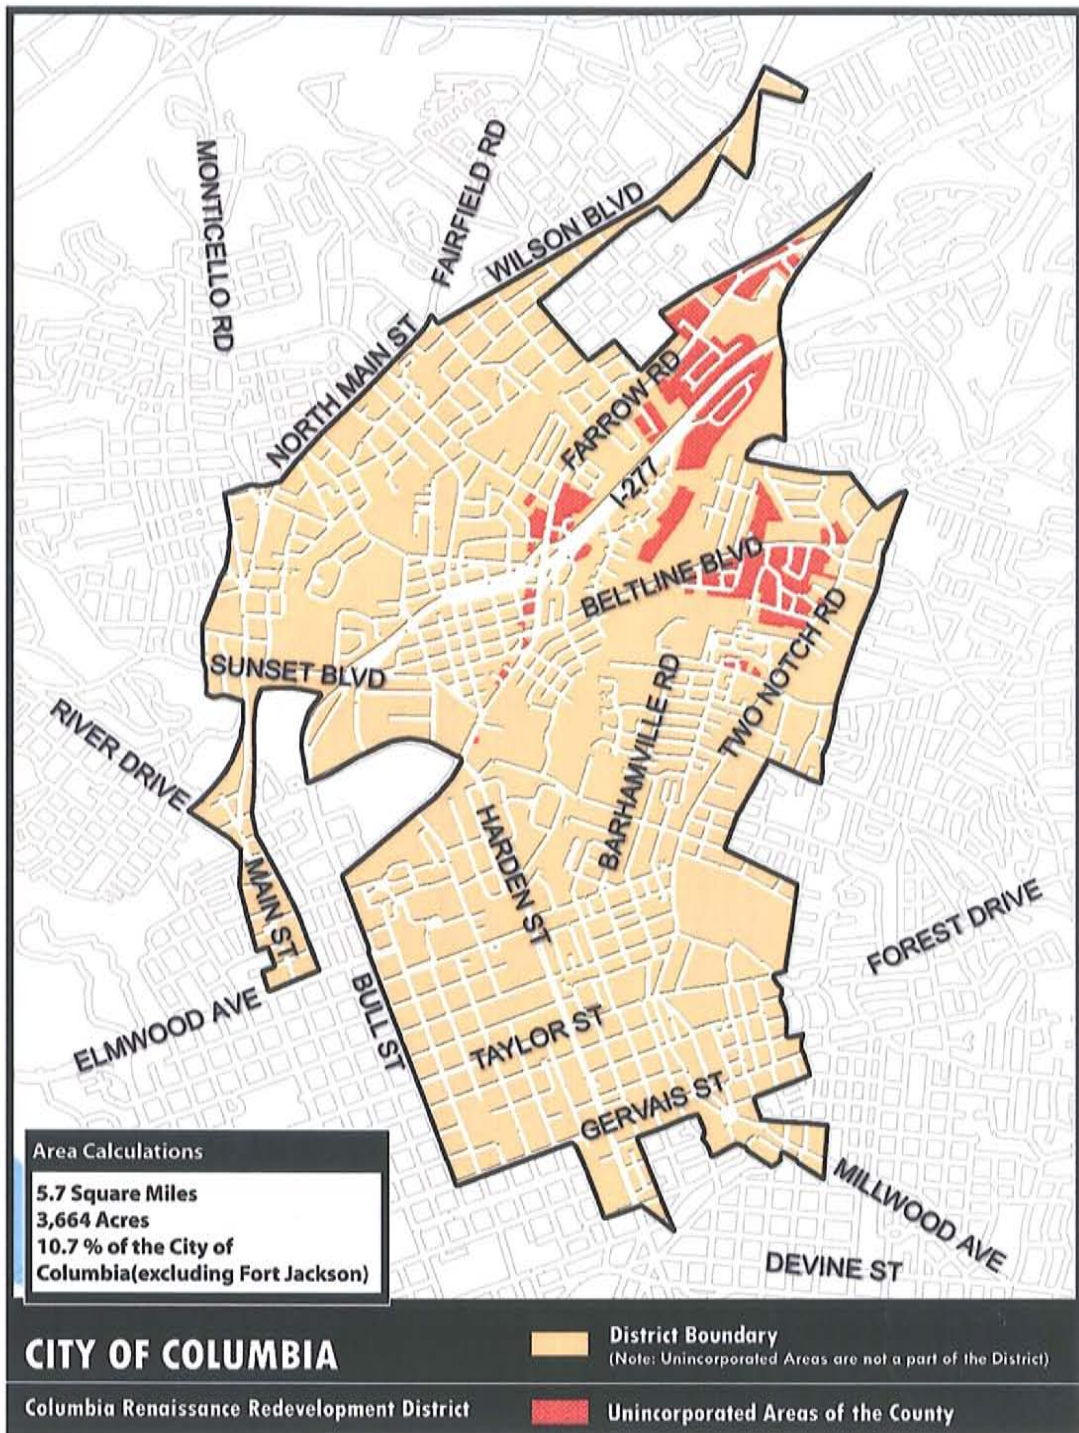

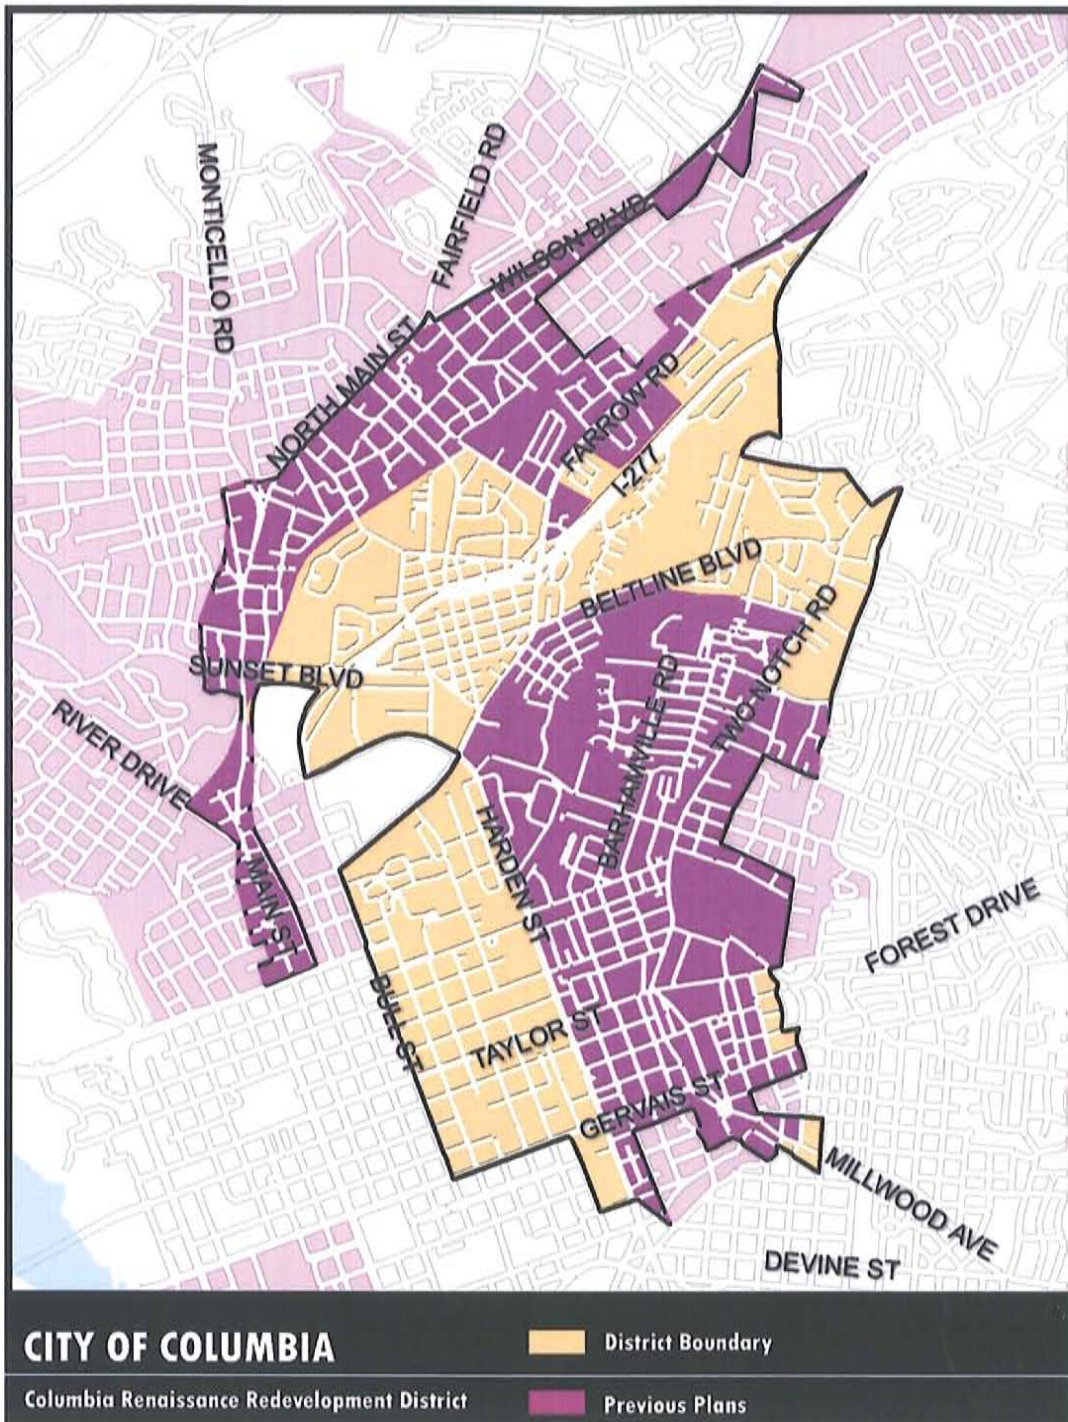

Figure 1.2: Map of Previous Studies

Civic and Institutional

There is a considerable amount of civic and institutional uses in the District, particularly in the Central Business District (CBD) where many of the government offices (federal, state, county and city) as well as Columbia College, Benedict College, and Allen University are located. However, there are civic and institutional uses throughout the District, including parks, schools, churches and similar activities.

Below is a more detailed analysis of the District based on the existing plans as well as a windshield survey.

1.2 Previous Studies

1.2.1 East Central City Plan

The following section is an excerpt of the site analysis of the East Central City (ECC Plan) developed by F.A. Johnson Consulting Group, Inc.:

East Central City is characterized by single-family residential neighborhoods with traditional commercial corridors and large institutional uses. The area encompasses +/- 1050 acres of blighted conditions. The neighborhoods have suffered from years of governmental neglect and suburban flight. Two former public housing projects, Celia-Saxon and Hendley Homes, and the existing Allen-Benedict Court and Gonzales Gardens public housing projects have contributed to this condition. These large developments of low-income housing often had up to 400 residents placed within an existing community, interrupting the established economic and physical fabric. Minimal redevelopment efforts and a lack of capital improvements have left the communities with abandoned homes, vacant lots and heavy crime areas. Basic services such as street lighting, sidewalks, trash removal and code enforcement are absent within the community. Areas of the Lower Waverly and Lyons neighborhoods have not seen any new development or public investment for decades.

The traditional commercial corridors of Gervais St, Two Notch Rd, Harden St and Millwood Ave also have a negative influence upon the neighborhoods. As neighborhoods continued to develop to the north and south of East Central City, the population followed and so did the businesses. Today, many existing strip centers are vacant or contain commercial interests that are typical with low rent areas. Currently there are two grocery stores within

the community.

Many positive elements exist within the community. The East Central project area is rich with history and a strong sense of community. The historic African American schools of Allen University and Benedict College provide a highly stable and untapped economic resource within the community. The schools combined enrollment exceeds 3500 students. The area also includes two new public schools and the C.A. Johnson Preparatory School. One of the city's largest hospitals, Providence Hospital, is located along one of the area's major arteries. Many neighborhoods have central gathering places, such as Pinehurst Park in the Pinehurst Community and Martin Luther King Park in the Lower Waverly neighborhood.

The neighborhood of Lower Waverly has been designated a historic district. The Waverly Neighborhood is currently pursuing a historic district designation. The Columbia Housing Authority, ("CHA"), has recently began the redevelopment of the existing Celia Saxon Homes into a community of for-sale single-family homes, small-scaled rental properties, institutional uses such as the Charles R. Drew Wellness Center and a retail district.. Benedict College has recently developed a Business Development Center located on Two Notch Rd in order to assist the community with reinvesting within the community and starting new businesses.

In some isolated instances, individual investors have recently returned to selective portions of the project area. New and renovated homes have been built within the past few years within the area by the Columbia Housing Development Corporation, a City sponsored corporation. New homes within the Midlands Terrace and Waverly neighborhoods have helped stabilize sections of their respective neighborhoods by introducing new residents to the community. However, as described above, this investment is the exception and not the norm.

1.2.2 Villages of North Columbia Plan

The following section is an excerpt of the site analysis of the Villages of North Columbia district (Villages Plan) developed by F.A. Johnson Consulting Group, Inc.:

The community analysis identified the existing conditions within the community. These conditions included existing land use patterns, existing transportation circulation, topography, and historic resources as well as existing and future market trends within the community. The most important element of the community analysis was the "Take-Part" Workshops. These workshops allowed the community to develop one voice in directing the future of their community. It allowed the

development team to interact, engage in conversation and elicit feedback about what the direction of the community should be.

North Columbia is a diverse community. It is best characterized by its beautiful, well established single-family neighborhoods, higher educational institutions, and vacant or neglected retail street corridors. The neighborhoods vary greatly in architectural style and size. Each neighborhood is unique. Some neighborhoods are historic developments of the early 19th century. The neighborhoods close proximity to downtown and their period architecture has resulted in an increase in home values and the attraction of residents with higher education levels. These neighborhoods have spurred new infill housing.

Efforts currently under way in many of these blighted neighborhoods include single family construction coordinated by the city sponsored Eau Claire Development Corporation (ECDC). The ECDC is a non-profit organization dedicated to the conservation and redevelopment of the North Columbia area. Established in 1993, the ECDC focuses on improving residential, commercial and cultural elements within the community.

The neighborhoods of North Columbia are bisected by traditional commercial street corridors. As identified by the North Columbia Coordinating Committee and public workshop participants, the majority of the area is absent of quality retail developments. These corridors, in particular N. Main Street, that run north from the Central Business District (CBD) to the Interstate 20, were developed based on the dominance of the automobile. Buildings are separated from the street by large, tree-less parking lots. As new suburbs were developed north of the area, many of the existing commercial establishments departed because they sought newer, larger facilities. Many of the former automobile stores and strip centers are now occupied by lower tier tenants or are vacant. Existing multi-family buildings are dated, not well maintained and poorly located. Most importantly, none of these corridors are pedestrian friendly. It is difficult, uncomfortable and dangerous for residents to walk along these corridors. New developments along N. Main Street show promise for the future of these streets. The future implementation of the long anticipated N. Main Street streetscape project, from Elmwood Avenue north to Fairfield Road will create a pedestrian friendly streetscape as well as reinforce the City's commitment to change within the area.

1.3 Areas Not Included in the Previous Studies

Since the areas outside the previous study boundaries are adjacent, they have similar characteristics:

1.3.2 Central Business District

Part of the original Guignard survey of the City of Columbia, this portion of the Central Business District incorporates a wide variety of uses, ranging from historic mansions in the “Garden District” to industrial uses along Harden Street. The area is bounded by Gervais Street on the south, Bull Street on the west, Harden Street on the east and Calhoun Street on the north. Taylor Street, a significant east-west connection, runs through the middle of the District.

The part south of Taylor Street is a mix of residential, commercial and institutional uses, including a portion of the University of South Carolina campus and the administrative offices for Richland County. Commercial activities range from offices to personal and business services, including a hotel and funeral home. There are pockets of residential, such as the townhouse complex on Barnwell Street, and the attached housing on Washington Street. The area near the intersection of Washington Street and Barnwell Street is a combination of smaller commercial uses but also the location of the Woodrow Wilson boyhood home and other historic homes. However, the area is also the location for two large parking lots for university students as well as a large percentage of vacant property.

The part north of Taylor Street is the area that has most of most historic homes in the city, many located in an area known as the “Garden District.” While the character of the area has changed over the years, during the past decade, the “Garden District” has seen a renewed interest in the historic significance of the sites and structures. Many of the structures in the “Garden District” started as residences, but over time most have transitioned to professional offices. With little exception, notably along Taylor Street, and the school district office on Richland Street, there has been very little redevelopment in the area. However, just east of the “Garden District” the uses transition to commercial and warehouse uses. At the intersection of Taylor Street and Harden Street is a cement company.

1.3.3 Bull Street Property

While some of the buildings are still in use, most of the buildings are vacant and were left in a state of disrepair. Over time, their condition has deteriorated further.

The firm Duany Plater-Zyberk & Company described the Bull Street site in the following way as part of their master plan for the property:

The South Carolina Department of Mental Health maintains a 178-acre campus situated in the northeast corner of Columbia's immediate downtown. Today's facility – bounded by Calhoun Street to the south, Bull Street to the west, Colonial Drive to the north, and Harden Street to the east -- began as a much smaller institution in 1828 within a state-of-the-art asylum designed by architect Robert Mills. Throughout the campus stand historically and architecturally significant structures that illustrate the evolution of the Department of Mental Health and state's commitment to treating the mentally ill.

1.3.4 Sunset Drive Corridor

This area is north of the Bull Street property, and includes the Harden Street Extension Corridor, the Palmetto Richland complex as well as the residential area bounded by Farrow Road and Highway 277. This portion of Sunset Drive is anchored by the Palmetto Richland medical complex which includes the hospital and associated doctor offices.

North of Sunset Drive is a residential neighborhood characterized by small, older homes, most of which were built between 1940 and 1960. While a good many of the structures are in good condition, the area is being impacted by blighting conditions including substandard housing, lack of code enforcement and overcrowded lots. The construction of Highway 277 split the original neighborhood, disrupting the grid network of roads.

1.3.6 West Beltline Blvd. Corridor

This portion of the District is along West Beltline Blvd from Farrow Road to Two Notch Road. West Beltline Blvd. and includes a mostly residential development adjacent to the corridor. West Beltline Boulevard is an auto-intensive corridor with multiple current and former car lots, a gas station and a shopping center with a large parking lot in the front.

North of West Beltline Blvd is a residential area separated by the railroad tracks. West of the tracks are several higher density residential areas including Bethel Bishop Apartments, Colony Apartments and the Bayberry Mew subdivision. On the east side is the more traditional suburban development of the 1950's to 1970's.

1.3.7 Two Notch Rd. Corridor

This portion of the District is along Two Notch Road from Covenant Road to Cushman Road and includes the mostly residential development adjacent to the corridor. The characteristics of this section of Two Notch Road are consistent with the characteristics described in the ECC plan. Two Notch Road was described as follows:

The Two Notch Rd commercial corridor has a negative influence upon the community. Many of the buildings along the corridor are vacant or in need of renovation. In addition, many of the corridors uses do not include daily uses or needs for the community residents. There are no grocery stores along this stretch of Two Notch Rd.

1.4 Demographic Overview

The 2000 Census population for the District was 20,817, which is a 7.7% decline from the 1990 Census of 22,546. The 2009 estimate of 18,974 and the 2014 projection of 17,774 show the population decline continuing. The 2000 population density of 3,652 persons per square mile was considerably higher than the metropolitan Columbia density of 169 persons per square mile. Table 1.1 shows additional demographic comparison.

Table 1.1: Demographics Overview

Characteristic	Metro Area	Study Area
Population Density	169 persons/sq.mi.	3,652 persons/sq.mi.
Median Age	35	27
Minority Pop.	39.00%	89.6%
Income <\$20K	22.3%	56.4%
Per capita Income	\$19,845	\$8,808
Blue Collar Jobs	37.60%	47.90%
Rental Housing	27.20%	61.93%
No Vehicle	7.80%	39.4%
Not a HS Graduate	17.90%	35.30%

1.5 Redevelopment Area Characteristics

According to the §31-6-30 of the TIF Act, a redevelopment project area is defined as:

... an area within the incorporated area of and designated by the municipality, which is not less in the aggregate than one and one-half acres and in respect to which the municipality has made a finding that there exist conditions that cause the area to be classified as an agricultural area, a blighted area, or a conservation area, or a combination thereof.

Blighted area is defined in the TIF Act as:

. . . any improved or vacant area within the boundaries of a redevelopment project area located within the territorial limits of the municipality where:

(a) if improved, industrial, commercial, and residential buildings or improvements, because of a combination of five or more of the following factors: age; dilapidation; obsolescence; deterioration; illegal use of individual structures; presence of structures below minimum code standards; excessive vacancies; overcrowding of structures and community facilities; lack of necessary transportation infrastructure; presence of or potential environmental hazards; lack of water or wastewater services; inadequate electric, natural gas or other energy services; lack of modern communications infrastructure; lack of ventilation, light, sanitary or storm drainage facilities; inadequate utilities; excessive land coverage; deleterious land use or layout; depreciation of physical maintenance; lack of community planning; and static or declining land values are detrimental to the public safety, health, morals, or welfare or;

(b) if vacant, the sound growth is impaired by:

(i) a combination of two or more of the following factors: obsolete platting of the vacant land; diversity of ownership of such land; tax and special assessment delinquencies on such land; deterioration of structures or site improvements in neighboring areas adjacent to the vacant land; overcrowding of structures and community facilities in neighboring areas adjacent to the vacant land; lack of necessary transportation infrastructure; presence of or potential environmental hazard; lack of water, or wastewater; lack of storm drainage facilities; inadequate electric and natural gas energy services; and lack of modern communications infrastructure; or

(ii) the area immediately prior to becoming vacant qualified as a blighted area . .

and Conservation Area is defined in the TIF Act as:

. . . any improved area or vacant area within the boundaries of a redevelopment project area located within the territorial limits of the municipality that is not yet a blighted area where:

(a) if improved, because of a combination of three or more of the following factors: age; dilapidation; obsolescence; deterioration; illegal use of individual structures; presence of structures below minimum code standards; excessive vacancies; overcrowding of structures and community facilities; lack of necessary transportation infrastructure; presence of or potential environmental hazards; lack of water or wastewater services; inadequate electric, natural gas or other energy services; lack of modern communications infrastructure; lack of ventilation, light, sanitary or storm drainage facilities; inadequate utilities; excessive land coverage; deleterious land use or layout; depreciation of physical maintenance; lack of community planning; and static or declining land values are detrimental to the public safety, health, morals, or welfare or;

(b) if vacant, the sound growth is impaired by a combination of two or more of the following factors: obsolete platting of the vacant land; diversity of ownership of the land; tax and special assessment delinquencies on the land; deterioration of structures or site improvements in neighboring areas adjacent to the vacant land; overcrowding of

structures and community facilities in neighboring areas adjacent to the vacant land; lack of necessary transportation infrastructure; presence of or potential environmental hazard; lack of water, or wastewater; lack of storm drainage facilities; inadequate electric and natural gas energy services; and lack of modern communications infrastructure; is detrimental to the public safety, health, morals, or welfare and may become a blighted area.

The previous studies along with a windshield survey of the District identified the following conditions indicating symptoms of blight but also areas in need of conservation:

Age

- The first ring subdivisions have a higher concentration of houses built prior to 1939
- Historic commercial buildings deteriorating due to lack of investment
- As currently used, many buildings are not required to comply with modern building codes; however, non-compliance with code restricts new business use
- Much of the commercial/retail offerings are geographically scattered

Dilapidation

- Many of the businesses lack aesthetics and lose potential customers because of poor infrastructure (utility poles, sidewalks)
- Scattered throughout the District are examples of multi-family and duplexes that are in poor condition. Most are exemplified by broken and/or boarded up windows, damaged facades, and damaged roofs.
- Also characterized by lack of new business relocation/construction in these areas
- While it is not always evident when a house is vacant, there are examples of some houses being boarded up. Others may be vacant while they are on the real estate market.

Obsolescence

- The oldest neighborhoods are characterized by small lots and small homes. Since these characteristics have been in low demand in the housing market over the past few decades, houses and lots are seen as obsolete, making them less attractive for reinvestment.
- Many properties are vacant or substandard due to years of previous industrial activity and have resulted in declining economic vitality.

Deterioration/Depreciation of physical maintenance/condition

- All of the corridors have commercial buildings that need renovation. Some are deteriorating due to lack of investment by the property owner, while others are deteriorating because they are vacant, with little or no attention paid to them
- Based on information provided by the City of Columbia Code Enforcement Department, since April 28, 2006, 42% of all code enforcement cases within the City originated from within the CRRD. When analyzed by category, the CRRD accounted for nearly 60% of all housing cases and over 50% of the property maintenance cases.

Lack of Community Planning

- Dangerous pedestrian conditions along some corridors due to too many curb cuts, poor lighting and lack of a vegetative buffer between the sidewalk and the street
- For many reasons, there are a high percentage of residents in the District that do not have a vehicle, limiting their ability to travel. However, some corridors do not include daily needs for the adjacent neighborhoods;
- The railroad creates a physical barrier, separating neighborhoods from the larger community
- Some of the commercial buildings, like the strip shopping centers, are fronted by large parking lots with no pedestrian connection to the street, making pedestrian access uncomfortable
- Some neighborhoods do not have access to public open space
- While some of the neighborhoods, like Eau Claire, have established a sense of place, many neighborhoods still lack a unique identity.
- Some areas does not have curb and gutter

Excessive vacancies

- Numerous vacant lots along the corridors negatively affecting the adjacent neighborhoods, not only impacting the appearance of the neighborhood, but creating a crime and public health hazard
- Many abandoned/boarded-up houses and apartments, lowering the property values in the neighborhoods, but also in some cases, attracting undesirable activity
- Businesses along major corridors are abandoned, boarded up, or have been closed for a significant period of time
- The area includes high or increasing commercial or residential vacancy rates, decreasing employment opportunities, or a diminishing retail presence in the area

Deleterious land use and layout

- “Dead” , abandoned or neglected retail uses along some of the corridors
- Negative impact of dilapidated subsidized housing on adjacent neighborhoods
- Infill development not in character with adjacent older neighborhoods, either due to architecture or density
- Negative impact of industrial uses on adjacent neighborhoods
- These buildings remain empty and contribute to a decline property values

Static or declining land values

- The previous studies noted the impact of businesses leaving the declining corridors of the CRRD, in some cases relocating to the suburbs.

Lack of transportation infrastructure

- The Central Midlands Regional Transit authority provides bus service to the CRRD with a dozen routes linking the CRRD to other parts of the metropolitan area. However, with no dedicated funding source for service, the ability for the CMRTA to provide service in the future is in jeopardy.
- Along many of the corridors, there are parcels with multiple curb-cuts, disrupting traffic flow and negatively impacting pedestrian access
- While the major corridors have sidewalks, their condition is generally poor and in most cases, do not provide a safe or aesthetically pleasing place to walk. Beyond the major corridors, some of the adjacent residential areas do not have sidewalks, limiting pedestrian access.
- The Fairfield Rd/N. Main Street intersection is poorly designed resulting in a safety hazard for vehicles and pedestrians

Lack of water/sewer/storm drainage infrastructure

- Older water and sewer lines will need to be upgraded to provide sufficient capacity for new development in the CRRD
- Areas of the CRRD experienced localized flooding, particular in heavy rainstorm, creating, not only traffic problems but have also resulted in personal property damage

CHAPTER 2 - LAND USE PLAN

2.1 Existing Land Use

Table 2.1 shows the breakdown of the existing land use in the CRRD. Reported acreage does not include acreage associated with roads and common use improvements.

Table 2.1 - Land Use by Acreage

Land Use Category	Area in Acres
Other/No Data*	264.6
Residential	1102.49
Sales/Service	306.33
Manufacturing/Construction	56.15
Trans/Comm/Info/Util	84.05
Arts and Entertainment	104.92
Institutional	1089.43
Agriculture/Forestry	188.07

* Includes property within unincorporated areas of Richland County, excluded from the District.

Note: Data based on 2007 Land Use Data provided by the City of Columbia

With approximately 7,700 housing units compared to 1,116 businesses, it is not surprising that residential development is the prominent land use in the District (Exhibit 3). The second most prominent land use in the District is Institutional, primarily in the Central Business District where many government offices are located. Additional institutional sites include the Palmetto Richland medical complex, schools, colleges and universities, parks and churches. Commercial development is principally located in the Central Business District, and along the major, North Main Street, Farrow Road, Two Notch Road, West Beltline Boulevard and Sunset Drive. Other land uses in the District include manufacturing/construction, transportation/communication/information/utility and agricultural/forestry.

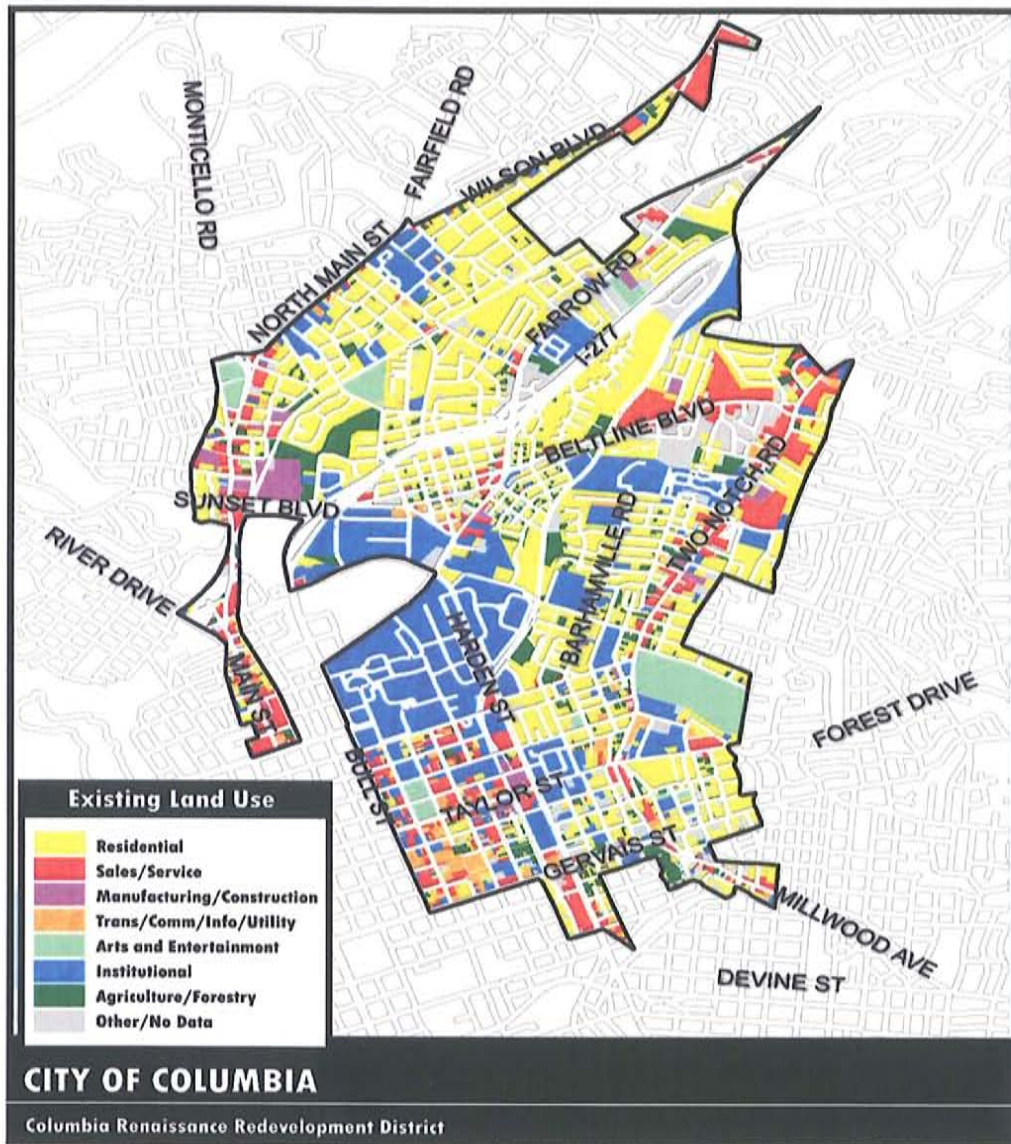

Table 2.2 shows a list of zoning districts within the District, and Figure 2.1 is a map of the land uses in the District.

Table 2.2: Zoning Categories

Zoning District	Intended Use	Density
Residential		
RS-1	Single-family detached	3.6 Du/Ac
RS-2	Single-family detached	5.1 Du/Ac
RS-3	Single-family detached	8.7 Du/Ac
RG-1	Single-family and two-family detached, multi-family residential	8.7 Du/Ac
RG-2	Single-family and two-family detached, multi-family residential	16.4 Du/Ac
RG-3	Townhomes and High Rise Residential	NA
PUD-R	Residential	NA
Non-Residential		
C-1	Office and Institutional	NA
C-3	General Commercial	NA
MX-2	Mixed Use, Urban	NA
M-1	Light Industrial District	NA
M-2	Heavy Industrial District	NA
PUD-C	Commercial	NA

Note: Du/Ac = Dwelling units per acre

Figure 2.1: Map of Existing Land Use

Note: Map based on 2007 Land Use Data provided by the City of Columbia

2.2 Future Land use

The concepts within each of the various subareas are specific to its needs, however there are general themes running through each of the subarea plans which should be the threads that tie the subareas together as the CRRD:

Mixed use corridors

Where appropriate, a mix of uses, including commercial, residential and civic should be encouraged. The mixture of uses promote a vitality of the area, allow for people to live, work and play within the community, encourages pedestrian movement and accommodates people of various abilities. Examples of possible mixed-use corridors included Harden Street and portions of Forest Drive and Gervais Street identified in the ECC plan and portions of Elmwood Ave and North Main Street identified in the Villages plan.

Activity centers or nodes

To give focus to neighborhoods or a larger community, activity centers or nodes should be identified. The centers should be unique in the character if provides to the community, ranging from civic uses such as schools and libraries, to neighborhood scale retail and services. While they are unique in character, there are common features such as compact design, higher densities, mix of uses, quality design standards and multi-modal connections, including pedestrian facilities and transit. The ECC plan identifies several activity nodes along Two Notch Road, and the Villages plan identifies several activity centers along North Main Street. The Bull Street plan is based on several concepts found in an activity center.

Pedestrian facilities

Linking destinations within the redevelopment area but also linking the redevelopment area to the region is important. Public and privately funded pedestrian linkages should range from improving existing sidewalks, adding new sidewalks that extend or complete connections to residential areas, schools, and commercial districts, and extending or connecting to regional greenways. Wayfinding signs and maps should also be made available to assist those using the network. Universal design standards to accommodate a wide range of abilities should be incorporated into the network. Both the ECC plan and Villages plan speak to the importance of the corridors being pedestrian friendly. The Bull Street plan has a significant pedestrian component since most of the development is within a 10 minute walk. For example, the thoroughfare plan includes street connections were pedestrians would dominate.

Open space preservation and creation

Active and passive parks along with protected natural features are important for the overall health and vitality of the community. Parks provide gathering spaces for the community offering activities that a person would not otherwise have on his or her property. Activities should range from the athletic, both organized and unorganized, to enrichment, such as classes and community events. Both the ECC plan and the Villages of North Columbia master plan identify several parks

for improvement and suggest locations for new parks.. The Bull Street plan identifies several opportunities for park and open space system connecting to the region, including the daylighting for a creek and creation of a lake.

Community identification/sense of place

Prior to their incorporation into the City of Columbia, many of the communities, particularly in the North Columbia area, were independent and distinct. Over the decades, the characteristics that made them unique have been lost. Creating programs to reestablish those unique qualities, and in some cases, changing the perception of a particular community, will help instill pride and help create a sense of place for those residents and business owners. As was discussed earlier, the ECC plan uses the activity centers to develop community focus by identifying unique characteristics based on the population they are expected to serve. The Villages of North Columbia master plan identifies three villages (Artist Village, College Village, and Gateway Village), again, each with their own unique characteristics). The Bull Street plan takes its guidance from the Lowcountry towns and the historic Columbia neighborhoods.. Similar opportunities for community identification within the CRRD will likely be in the form of activity centers.

Residential Density

As was highlighted in Chapter 1, the population density in the CRRD is much higher than the metropolitan area. Since much of the recommended land use policies encourage medium to high density development and with much of the redevelopment in the Bull Street adding residential uses that are not currently there, it is expected that the population density numbers will increase.

The City of Columbia Comprehensive Plan does not speak to specific densities, but the city's zoning districts within the District allowed densities ranging from 3.6 to 16.4 dwelling units per acre for residential development. When calculated using the number of acres in residential use, the density in the CRRD is 5 units per acre. In the northern part of the Districts higher densities are recommended particularly in the activity centers where residential densities should reach 12-14 units per acre.

The Bull Street plan does provide estimates for the number of new residential units. The plan recommends an additional 1,257 dwelling units ranging from large houses to live/work units, resulting in overall density of 7 units per acre. At the CRRD average of approximately 2.7 persons per dwelling unit, there would be an additional 3,394 residents in the District.

Commercial Density

As with the residential component, the city's comprehensive plan does not have specific standards for commercial density. However, as with residential development, the recommendations are for medium to high density development, particularly along the corridors and the activity centers of the northern part of the District. Commercial development should range from 12,000 to 20,000 square feet per acre

The Bull Street plan identifies approximately 816,800 square feet of commercial space, resulting in a density of 4,589 square feet per acre within the Bull Street property.

CHAPTER 3 - GOALS AND OBJECTIVES

As discussed in Chapter 1, the current conditions of the Columbia Renaissance Redevelopment District meet the test for blighted or conservation area as defined in the TIF Act. The City believes that public improvements are necessary to stimulate private investment in the area and thus diminish the blighting influences.

This chapter of the document will identify goals and objectives for the CRRD. What follows are broad goals for the District with supporting objectives taken from the City of Columbia Comprehensive Plan, the East Central City Redevelopment Plan, the Villages of North Columbia Redevelopment Plan, and the Bull Street plan.

Goal: Identify strategic economic development opportunities that enhance the character of the community

The City has taken steps to foster redevelopment within the CRRD and has even begun the process of adopting guidelines to foster responsible development. To help encourage private investment in the CRRD, the City should look and work with the private sector to identify catalyst projects that are in keeping with the overall goals of the District.

- Identify and encourage development in locations that existing infrastructure can serve before extending new infrastructures into other areas
- Promote quality and desired in-fill development, and expansion by using capital improvements to revitalization underutilized areas with existing infrastructure
- Develop and invest in improving existing infrastructure at adequate, efficient, and required levels of service
- The Gervais St and Taylor St corridors/intersections should not only be redeveloped to create a sense of “place” for the East Central City but also to create a significant “front door” for downtown district
- Develop primary road corridor design overlays
- Identify potential uses and operators
- Identify potential partnerships
- Provide incentives for greyfield/brownfield redevelopment
- Coordinate streetscape and utilities improvement

Goals: Ensure adequate infrastructure for current and future development

While the District is within the urbanized area of the metro region, aging facilities such as deteriorating or small water and sewer lines could inhibit growth in the District. Conversely, the fact that there are urban facilities in the District should be used to direct new development into the District instead of that development locating to a “Greenfield” site in the suburbs or even the rural fringe.

- Adequately and timely fund capital improvement projects to improve the operational efficiency, use and/or life expectancy of existing city facilities

-
- Establish municipal water service boundary (MWSB) for City of Columbia to promote in-fill development and redevelopment of blighted areas.
 - Require the adaptive reuse of existing buildings before new community facilities are constructed
 - Permit and encourage green infrastructure and design as a way to make Columbia's community facilities sustainable
 - Fund and pursue land acquisition to allow adequate and proper expansion of necessary community facilities throughout Columbia
 - Allocate funds to expand and upgrade community facilities so they may better serve the public's needs
 - Establish timely and complete processes for the funding and completion of systems enhancements and maintenance to become proactive in addressing needs and service issues
 - Infrastructure investment

Goal: Promote diverse residential development

While preserving the single-family residential "core" where appropriate, other forms of residential development should be encouraged as a means to provide a greater diversity of residents, but to also accommodate the changing needs of current and future residents.

- Encourage the diversity of housing types to meet the needs of all citizens
- Dedicate funds for the recapitalization of the CityLender home loan program
- Include a mix of building types such as office buildings, live-work units, shop fronts, courtyard apartments, mews houses, apartment houses, town houses, small houses and large houses

Goal: Encourage context sensitive development

New development and redevelopment should respect the existing pattern of development. Consideration should be given to scale, lot size, building design and layout, and street connective, among others. One way to accomplish this goal is by creating context sensitive design guidelines and even residential planbooks for new development.

- With many established neighborhoods experiencing the loss of larger existing homes through lot subdividing, the City of Columbia should develop guidelines and policies to better regulate and guide this process
- The existing single-family fabric of the neighborhoods should be preserved and enhanced
- Existing homes should be restored when feasible
- New infill development within these cores should focus on single-family homes that are consistent in style and scale with the surrounding community
- Code enforcement should be increased to prevent the deterioration of existing buildings and lots
- Infrastructure investment

Goal: Preservation of Open Space

Parks and preserved natural resources contribute to the open space of the community. Finding opportunities to expand the park system by improving existing parks and building new parks with the notion that they serve as “outdoor” rooms for the community contribute to the community character. Preserving natural resources such as streams and ponds help to protect the environment, furthering the goal of sustainability.

- Identify and implement innovative and sustainable ways to protect both surface and ground water sources from contamination and pollution
- Identify and protect the natural, traditional course for water drainage
- Work consistently to raise the standards of quality for all surface waters.
- Study and develop a natural water bodies buffer plan
- Develop special zoning and/or overlays to encourage cluster zoning/low-impact development for sensitive areas to ensure their protection and preservation
- Form a committee to develop and implement an extraterritorial jurisdictional boundary for the City of Columbia’s future growth and development
- Study the capability of smart growth, as well as similar practices, and their potential application and effect for the City of Columbia
- Expand and interconnect greenways and trails throughout Columbia
- Fund and implement active procurement of land for future parks
- Create in-fill parks on available open tracts of land to better serve neighborhoods
- Require a percentage of park space, public and private, for all new residential and large-scale commercial developments
- The creation of additional pocket parks, and a linear trail space that connect neighborhoods to activity nodes
- Identify issues/needs within existing parks
- Acquire areas for new parks as identified by the Master Plan
- Identify funding sources
- As part of the Bull Street redevelopment, connect the floodplain and creek within the site to a regional greenway network beyond the site, ultimately connecting to the Broad River

Goal: Preserve and enhance community character

Find the unique features of a community and implement activities to protect and enhance those features. Activities could range from simple signage letting people know they are entering the neighborhood, to adopting design guidelines based on the unique architecture of a specific area.

- Articulate the unique heritage and character of Columbia through monument gateway entrances and unique identifying design and facilities
- Strive to improve the quality, aesthetics, and access to commercial corridors throughout Columbia
- Encourage and promote innovative architectural design
- Existing homes should be restored when feasible

-
- New infill development within these cores should focus on single-family homes that are consistent in style and scale with the surrounding community
 - Establish community branding identification
 - Implement a marking campaign to combat the negative perception of a being a high crime area
 - Improve community markers and develop Gateway monuments
 - Create volunteer clean-up brigades for each district

Goal: Encourage multi-modal transportation

Connectivity within the District, but to the regional beyond is a key component for the success of the redevelopment area. Pedestrian access has already been discussed, but in an area where approximately 30% of its residents do not have access to a private vehicle, transit access is also critical.

- Encourage the use of MX zoning districts citywide, especially along gateway corridors.
- Reduce the need for single occupancy vehicle trips and travel through better land use planning techniques
- Provide more opportunities for neighborhood scale commercial and retail.
- The City of Columbia should begin to study the potential benefits and effects of implementing Form-Based Zoning.
- Repair damaged sidewalks
- Replace missing sidewalks
- Close and consolidate curb cuts when feasible
- Improve bus stops with shelters
- New development should focus equally on traffic flow and safer pedestrian movements

While the goals listed should apply to the entire CRRD, there are specific goals that will apply uniquely to each subarea in the District. The northern part of the District, including the subareas of the East City Center and Villages of North Columbia, the goals focus on preserving, protecting and enhancing the existing development. The Bull Street plan illustrates the redevelopment of the former hospital campus into a traditional neighborhood. Goals address a combination of uses, the street pattern and connectivity, and greenway/open space needs. Subsequent planning for the redevelopment area should look at ways to implement the specific

CHAPTER 4 - STREET LAYOUT

The street system in Columbia's urban neighborhoods is based on time-honored planning principles. The streets form an interconnected grid, with a hierarchy of streets with different transportation functions. Columbia's planning documents also recognize that the streets have other important functions:

- Defining the boundaries of neighborhoods and districts.
- Providing the setting for development and enhancing the character of the community.
- Determining the intensities of adjacent development
- Providing routes for pedestrians, bicycles and transit, as well as private automobiles.

The *Comprehensive Plan 2018* notes that traffic congestion is less severe inside the beltway of interstate highways than in the suburban areas outside the beltway, due to the interconnected street grid in the City Center and the lack of interconnectivity in the suburban areas. Within the CRRD, any changes or extensions to the street system should respect the following principles, which have been drawn from Columbia's existing plans:

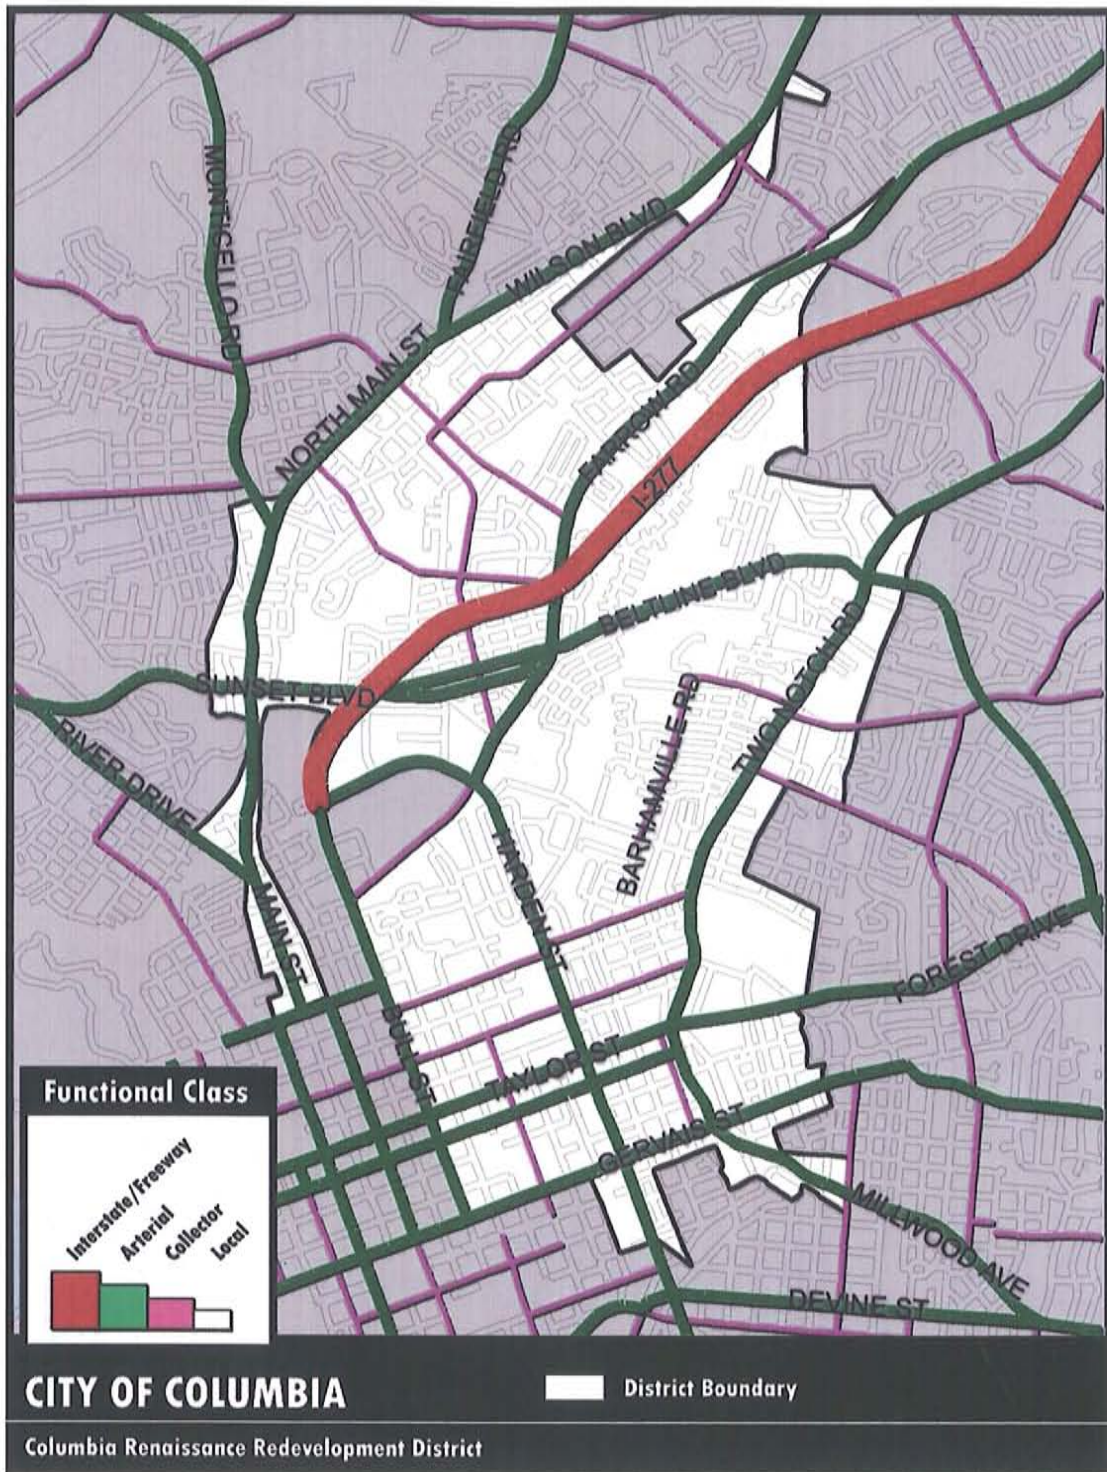

- **Maintain an interconnected grid system.** The grid does not have to be rigid—the Comprehensive plan notes that the area inside the beltway is served by a “linear or curvilinear grid”. Extensions of existing streets should reinforce the existing grid, and existing elements of the grid should not be compromised through street closures or consolidation of land into “superblocks”.
- **Develop a system of *Complete Streets*.** The Complete Streets concept recognizes that, while moving automobile traffic is a primary purpose of all streets, these streets must also provide for safe and efficient movement of pedestrians, cyclists and transit.
- **Recognize the importance of streetscapes to the sound development of neighborhoods, districts and employment centers.** Beyond providing access to property, streets also have a profound influence on the character of the development on adjacent properties. The design and appearance of streets can enhance or degrade nearby neighborhoods, businesses and community facilities. Streets should be designed in context with the desired character of the neighborhoods and districts they serve. Landscaping, lighting, pedestrian ways, “way finding” signage and other design features.

The principles above are supported by guidance in the City's Comprehensive Plan and the City Center Design Standards as well as more specific plans for the Bull Street site, Villages plan, and ECC plan. These planning documents should provide guidance to all new development of transportation facilities and land in the CRRD.

Because the Bull Street property was originally developed as a special purpose institutional site, its redevelopment as an urban, mixed use district will required establishment of a new street network. This network and alternatives are depicted in detail in the Bull Street plan. Most other development in the CRRD will be served by the established street grid.

Figure 4.1 shows the interconnected street network serving the CRRD. New development and redevelopment in the District should provide logical connections to the existing network.

Figure 4.1: Map of the Existing Street Network

CHAPTER 5 - TAX INCREMENT FINANCING (TIF)

A. TIF DEVELOPMENT STATEMENT OF BENEFITS

This redevelopment plan supports the construction of several Catalyst Projects (as defined herein). These Catalyst Projects will assist in the elimination of blighted conditions in business districts addressing unfit, unsafe, and economically unproductive buildings.

This redevelopment plan for the CRRD provides opportunities to develop unused land space to positively impact neighborhoods and foster economic development. Doing so will attract private developers to assist in the development of lagging communities and accelerate the revitalization efforts of several communities and ultimately providing jobs.

This redevelopment plan combines the strengths of the private sector to those of the CRRD. These Catalyst Projects are unlikely to emerge without the public investment contemplated by this redevelopment plan and the incentives for developers.

B. TIF CATALYST DEVELOPMENT OBJECTIVES

The objectives of the Catalyst Projects described in this redevelopment plan are as follows:

- Expand Columbia's economy to create more living-wage jobs, emphasizing job opportunities for unemployed and underemployed residents.
- Attract and expand new and existing services, developments, and employers to position the City to compete in the economy of the 21st century.
- Provide an array of housing choices with an emphasis on affordable housing that meets the needs of current residents and attracts new residents to the city.
- Eliminate blighting influences throughout the CRRD.
- Increase neighborhood retail services; develop commercial corridors and employment centers.
- Support redevelopment initiatives that enhance and preserve unique urban features and amenities, including downtown, the waterfront and historic structures and communities.

C. TIF REAL ESTATE IMPROVEMENTS

Redevelopment of the Columbia Renaissance Redevelopment District is a massive undertaking that will require multi-faceted investments, and cooperation and support from all sectors. Many projects cannot succeed with private investment alone and will require public investment incentives, loans, grants and other public investment.

The estimated capital investment associated with developing all components of the CRRD are estimated for the purpose of this redevelopment plan. The final costs may vary significantly from actual costs depending on final development decisions, unforeseen obstacles and facilitating factors.

The following table shows the projects, more particularly described in Appendix A (the “Catalyst Projects”), which are examples of private development which the City intends to promote, foster and facilitate within the CRRD. The City intends to use tax increment revenues, proceeds of obligations payable from and secured by such tax increment revenues (the “TIF Bonds”) and/or a combination of the foregoing, to finance certain capital expenditures and other public investments (collectively, the “Public Projects”), to promote, foster and facilitate the Catalyst Projects. The column labeled “Private Investment” in the following table refers only to the vertical construction costs associated with the Catalyst Projects (e.g., it does not include redevelopment costs funded from tax increment revenues or proceeds of the TIF Bonds), and the column labeled “Improvements” outlines the general nature of the Catalyst Projects. A detailed breakdown of the Public Projects follows this table. As with any commercial development, however, the size, scope and cost of the Public Projects and the Catalyst Projects resulting there from, are dependent upon several factors outside the City’s control, including but not limited to economic and market conditions, and the presence, activity and financing wherewithal of private developers.

Catalyst Project No.	Project Description	Private Investment	Improvements
1	Sunset Hotel Development	\$ 4,500,000	A new 56,000 square foot hotel development on 2.8 acres of commercial property that is currently vacant.
2	North Main Development	750,000	A new 4,500 square foot restaurant franchise on currently vacant commercial property
3	Senior Matters Project	37,698,385	A new 245,154 square foot open living facility for seniors and physically challenged individuals on 9.9 acres of vacant land.
4	Allen University Mixed Use Development	4,394,060	A new 48,064 square foot mixed business and residential development with retail space on the first level.
5	Columbia College Development	3,838,560	Approximately 79,000 square feet of residential and retail space on commercial property that is currently tax exempt.
6	Wellness Center at Two Notch Road	9,993,061	Approximately 100,000 square foot building with medical office/technology, retail and restaurant uses on 3.32 acres of vacant land.
7	Bull Street Development	<u>388,700,000</u>	Approximately 500,000 square feet of commercial and office space and 1,243 residential units on 178 acres of land that is currently tax exempt.
Total		\$449,874,066	

* All amounts are estimated.

Public Projects

Street Improvements

1. Improvement to existing streets including extensions, changes to pavement or lane widths, intersection improvements, signalization, creation of on-street parking, sidewalks, curb and gutter, storm drainage. Landscaping, lighting, signage, and related infrastructure.
2. An improved vehicular connection and relocation of streets as needed
3. Entry/gateway features including landscaping, lighting, signage and other improvements at major entry points into the CRRD
4. Construction of new streets, including sidewalks, curb and gutter, storm drainage, landscaping, signalization, signage and related improvements required to serve the redevelopment area
5. Planning, engineering and other professional services related to the items above based upon a 5 year TBD utility capital improvement program estimated to be \$30,000,000

Utility System Improvements

1. Improvements to public water , sewer, electric, stormwater and communication systems as required to bring the systems up to date and make them functional for planned development
2. Acquisition of utility easements, rights-of-way or other property rights associates with the provision of new and improved utility services or removal of obsolete systems
3. Removal of overhead utility lines and replacement with new below ground systems
4. Demolition and disposal of obsolete utility system components
5. Construction or improvements to administration spaces relating to utility systems
6. Planning, engineering and other professional services related to the items above
7. Public safety Shot-spotter gunshot location plat
8. Tactical wireless video/audio surveillance system
9. Broad band wireless (Wi-Fi and Wi-Max)

Property Acquisition

1. Surveys and appraisals related to all projects
2. Historic preservation surveys, nominations and design
3. Planning, design, engineering and architectural services related to all projects
4. Environmental studies and abatement for all projects
5. Legal services for all projects
6. Marketing, advertising and related costs for all projects
7. Financing, including fees and costs associates with bond issuance or re-issuances, reporting and ongoing management of bond funds

Financing Costs

1. Construction interests
2. Debt service reserves
3. Bond issuance or re-issuance

Total Expected Qualifying TIF Costs:

\$40,000,000

CHAPTER 6 - REDEVELOPMENT FINANCING

Estimated Project Costs – Anticipated Sources of Funds

Financing for the redevelopment will come from a mixture of public and private investment. Public sources of funding include up to \$40 million of TIF Bonds and tax increment revenues (or a combination of the foregoing). Private sector sources of funding include financing from developers and private investors. The table below shows the proposed available sources of funding for Public Projects and the Catalyst Projects.

1. Funding Sources

Public Investment (Public Projects) (TIF Bonds/Tax Increment Revenues)	\$ 40,000,000
Private Investment (Catalyst Projects) (Private Financing and Developer Cash)	<u>\$449,874,066</u>
Total Funding Sources:	<u>\$489,874,066</u>

The City will not solely rely on tax increment financing to implement the CRRD. It will aggressively seek to attract investment from the county, state and federal governments and from private sources as well. Success in attracting other funding will lessen the need for tax increment financing and will reduce the possible impact of the plan on all local governments. Other possible sources of funding include the City of Columbia Utilities and Engineering Capital Improvement Program, Federal Empowerment Zone funding, Community Development Block Grant funding (CDBG), and other taxable and tax exempt bond financing, some of which private developers may qualify for.

2. Assessed Values of Future Development

Creating an environment that is attractive to new private investment is the fundamental objective of the CRRD. The areas where this new investment will need to occur are presently vacant or blighted and not a productive part of the community's tax base. New investment in the CRRD is the opportunity to create new jobs, additional businesses and residents, and long term increases in the tax base.

Consistent with state law, the County is presently reassessing the taxable and market values assigned to all of the property within its geographic boundary (including the CRRD); almost all of such reassessments have been complete, with less than 1% of the properties within the CRRD continuing to be subject to the appeals process. Subject to final resolution of all such appeals, the most recent equalized assessed value of the properties within the District is **\$31,595,500**. It is estimated that after completion of the redevelopment of the CRRD (e.g. that all Catalyst Projects are completed), the equalized assessed value of the properties within such area will be approximately **\$54,140,902**, which is an increase of **\$22,545,402**. The assessment of new buildings resulting from the

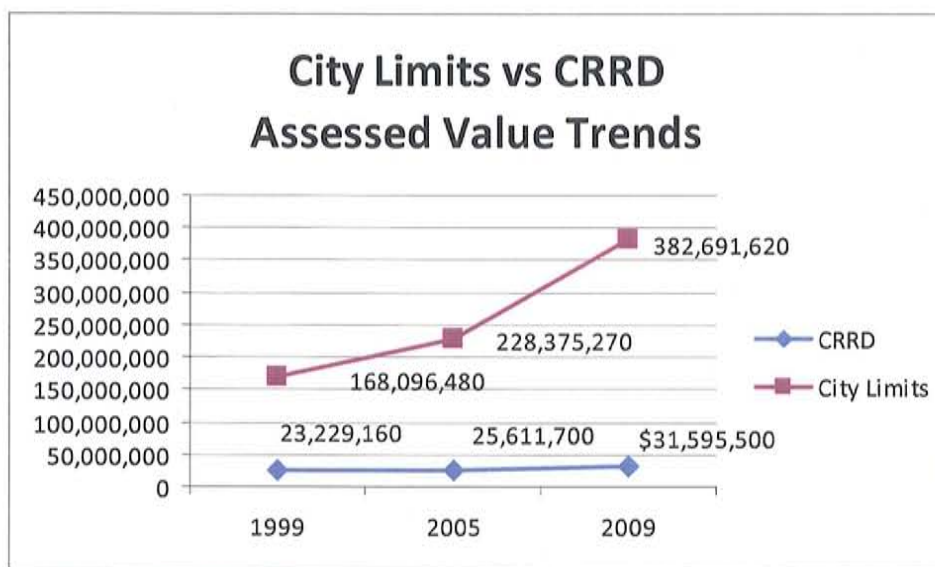

Catalyst Projects was derived by adding the current agricultural tax value of the land to the cost of the vertical construction of the buildings (does not include infrastructure or other public improvements)

**CHAPTER 7 - EQUALIZED ASSESSED VALUATION OF THE COLUMBIA
RENAISSANCE REDEVELOPMENT DISTRICT**

The CRRD is comprised of 6,304 parcels that span 5.7 square miles. The most recent equalized assessed value of the properties within the District is \$31,595,500, subject to final resolution of all appeals during reassessment. Please see Appendix B for a full listing of all properties that are included in the CRRD.

CHAPTER 8 – FINANCIAL IMPACT ON THE TAXING DISTRICTS

Five local taxing jurisdictions have historically received property tax revenue from properties located in the Columbia Renaissance Redevelopment District: the City, Richland County, School District No. 1 of Richland County, the Riverbanks Zoo and Gardens and the Richland-Lexington Airport District. Due to the general decline of the area, real property tax revenues generated from the properties within the CRRD have slightly increased, but that increase has been disproportionate compared to the rest of the property within the full corporate limits of the City of Columbia. As shown in the line graph below, there was a 35.86% increase from 1999 to 2005, and a 67.57% increase from 2006 to 2009, respectively, in assessed values for real property within the entire corporate limits of Columbia. For the CRRD the increase was only 10.26% and 23.36%, respectively, for the same period.

In the CRRD, certain community segments are experiencing business flight making it difficult to attract mature high-growth businesses and leads to loss or lack of revenues. Business license fees, hospitality fees, and tourism taxes are concentrated in Five Points, the Downtown Business District, Congaree Vista, and Innovista. For the East Central and North Columbia Communities, such focus does not exist and lacks mature existing businesses.

The following table shows the present real property tax revenues received by the five taxing districts from the properties located within the CRRD (based on an assumed initial equalized assessed value of \$31,595,500 and a 100% collection rate), broken out to reflect operational millage (except that (a) the City does not presently segregate its millage levy and (b) revenues attributable to School District No. 1 of Richland County do not reflect operational millage levied on owner-occupied residential real property (so-called “4% property”)) and millage levied for the payment of bonded indebtedness (e.g., general obligation debt). According to information provided by the Richland County Auditor, the assessed value of the 4% property in the CRRD is \$6,043,210. Furthermore, none of the real property tax revenues shown below reflect property tax relief eligible for property owners, such as the Homestead exemption.

City of Columbia (98.1)	(\$3,099,519)
Richland County Operating (47.1)	(\$1,488,148)
Richland County Bonds (9.0)	(\$ 284,360)
Richland County Other Agencies (43.7)	(\$1,380,723)
School District No. 1 of Richland County (231.4)*	(\$5,912,800)
School District No. 1 of Richland County Bonds (53.0)	(\$1,674,562)
Riverbanks Zoo and Gardens (1.3)	(\$ 41,074)
Riverbanks Zoo and Gardens Bonds (0.7)	(\$ 22,117)
Richland/Lexington Airport District (0.0)	(\$ 0)

* Excludes operational millage assessed on owner-occupied residential property

After adoption of the CRRD, the County will certify the current assessed values of the property within the CRRD (the “initial equalized assessed value”), upon which real property taxes are generated. If any of the TIF Bonds are issued, the five tax districts will continue to receive real estate property taxes from properties in the CRRD based on the initial equalized assessed values (the “current taxes”). However, any real property tax revenues attributable to assessed values in excess of the initial equalized assessed values (the “incremental tax revenues”) will be re-directed under state law (1) to be used for the payment of debt service on obligations issued to fund redevelopment projects or actual or budgeted redevelopment project costs or (2) if surplus amounts remain after applicable above, to be distributed to the five tax districts consistent with the distribution of current taxes. Assuming no changes in millage rates or assessed values of properties in the CRRD, each of the entities will continue to receive the tax revenues shown above (as applicable, assuming 100% collection rates) and no entity will lose any existing revenue. Moreover, until any of the TIF Bonds are issued, the five tax districts will continue to receive real estate property taxes from properties in the CRRD based upon then-current assessed values (e.g., no moneys are re-directed for redevelopment costs or debt service until some of the TIF Bonds are issued).

In order to accomplish this Redevelopment Plan, the City intends to issue tax increment bonds to fund all or a portion of the redevelopment costs. Tax increment bonds represent a loan to the City that is repaid from tax increment revenues, that is, real estate property taxes paid by new private investment within the CRRD. The City can issue tax increment bonds only to extent that it has

revenues available to repay the debt. As a result, at this time, it is impossible to say with certainty the actual amount of tax increment bonds that will be issued.

As described above, the City may issue up to \$40 million in TIF Bonds to finance the Public Projects. The City is not obligated to issue bonds in this amount; however, the City cannot exceed the stated maximum. Future City Councils will have the task of deciding when and how to best finance the Public Projects based on the community's success in attracting new investment, the availability of tax increment revenue or other sources of funds to support or secure the City's payment obligation, the City's overall financial position, and the needs within the CRRD.

Under the TIF Act, the City will have 10 years from the adopting of this Redevelopment Plan to issue the initial series of TIF Bonds to finance all or a portion of the Public Projects. Provided that the City issues such initial series of TIF Bonds within such 10 year period, the City may issue subsequent obligations to finance Public Projects provided such obligations mature on or before the expiration of this Redevelopment Plan, and further provided that the aggregate principal amount of TIF Bonds previously issued and to be issued by the City does not exceed \$40 million. Any tax increment bond issue will require the adoption of a bond ordinance by the City Council at a future date. The potential \$40 million total includes actual project costs, reserves and allowances for increased costs in the future. The term of any TIF Bonds that the City may issue will not exceed 25 years from their issuance date. Notwithstanding the foregoing, regardless of whether or when tax increment bonds are issued, the duration of this Redevelopment Plan may not exceed 25 years from the date of adoption.

Each of the five tax districts will benefit significantly in the short and long terms from the implementation of this Redevelopment Plan, and the Public Projects and Catalyst Projects contemplated hereby. In the short term, the Public Projects will improve streets, intersections, utilities and other infrastructure that are used by all. In the long term, the Public Projects and Catalyst Projects will help attract high quality investment to the CRRD that will add to the tax base and financial strength of each tax district. Upon completion of the redevelopment projects contemplated by this Redevelopment Plan, the CRRD will be dissolved and the full financial benefit of all growth that has occurred within the CRRD will accrue to each tax district.

The table below shows the projected impact of this Redevelopment Plan on each taxing district in fiscal year (FY) 2019-2020. The budgets of each taxing district for FY 2019-2020 have been estimated using such taxing district's current general fund budget (FY 2009-2010), which (except in the case of the City) does not include the payment of debt service on general obligation bonds, as the base year and assuming annual rates of growth as described below. The real property tax revenues that would be foregone by each taxing district through this Redevelopment Plan are computed based on current tax millage rates imposed for operating purposes only (except with respect to the City, which does not presently segregate its millage levy), assuming a 100% collection rate, and applying such millage rates to the \$449,874,066 in new taxable real estate investment assumed to be completed during such period. **This amount of investment would generate \$6,164,526 in new tax revenues and would be sufficient to pay debt service on \$40 million in TIF Bonds over 25 years (assuming \$3,092,646 of annual debt**

service at average interest cost of 6% per annum). The City expects the maximum impact on the taxing districts to range from 0.68% to 1.89% of projected budgets.

Except with respect to the City, as noted above, the foregone revenues calculations for the listed taxing districts do not include millage levied for the payment of debt service on general obligation bonds. In addition, in order to give effect to Act 388 (discussed below), the foregone revenue calculation for School District No. 1 of Richland County do not reflect operational millage levied on owner-occupied residential real property (“4% property”). Finally, none of the real property tax revenues shown below reflect property tax relief eligible for property owners, such as the Homestead exemption.

<u>Tax District</u>	FY 2009-2010 <u>Budget</u>	FY 2019-2020 <u>Proj. Budget</u>	FY 2019-2020 Proj. <u>Rev. Foregone</u>	FY 2019-2020 <u>% of Proj. Budget</u>
City of Columbia*	\$106,303,068	\$116,973,092	\$2,211,701	1.89%
Richland County*	133,794,584	147,792,457	2,047,123	1.39
Rich. Co. School District One*	238,450,399	279,383,349	1,893,018	0.68
Riverbanks Zoo and Gardens*	1,868,100	2,535,051	29,309	1.16

* Based on discussions with representatives of the respective taxing districts, the projected FY 2019-2020 budgets for such taxing districts have been computed by assuming annual increases from the FY 2009-2010 budgets equal to the following growth rates: City of Columbia (various, ranging from 0.9% to 2.1%), Richland County (1.0%), Richland County School District One (2.0%), and Riverbanks Zoo and Gardens (3.1%). Presently, no real property tax revenues are collected within the District with respect to the Richland/Lexington Airport District; assuming the Airport District continues not to impose real property taxes therein, the issuance of the tax increment bonds contemplated hereby should have no financial impact on the Airport District. The information included in this table, including the growth rates assumed thereby, are estimates only based solely on assumptions made for the specific purposes of this table; in no way should this information be used as a forecast of future economic development or fiscal strength (of the City or the respective taxing districts) or otherwise to be construed or interpreted for any other purpose.

In 2006, the South Carolina General Assembly, by legislation and constitutional amendment, made substantial revisions to the authority of local governments to increase property tax rates and to the method of revaluing property in periodic reassessments. The basic legislation was amended in 2007 to address issues in implementation. The principal effects of Act 388 of the General Assembly of the State of South Carolina for 2006 and Act 57 of the General Assembly of the State of South Carolina for 2007 (collectively, “Act 388”) on local governments were to limit increases in property tax rates and limit on increases in value of property for property taxes as a result of periodic reassessment.

South Carolina requires periodic reassessment of real property to establish its value for purposes of imposing taxes. Act 388 and the accompanying constitutional amendment provide that the fair market value of real property for *ad valorem* tax purposes must be determined at the later of: (1) property tax year 2007, (2) the date an assessable transfer of interest occurs, (3) the time of a county-wide reassessment, which is required to occur every five years (provided, in the case of a reassessment, that the increase in the fair market value of real property cannot exceed 15% within a five-year period, except to the extent the property is improved, sold or made subject to another “assessable transfer of interest”) and (4) the time of an appeal that results in a

redetermination of fair market value. The assessment method of Act 388 adds to the fair market value of real property, as determined above, the fair market value of subsequent improvements and additions to the real property.

Generally speaking, projections of future assessed value growth, especially in light of statutory and legal restrictions which change from time to time, are inherently difficult to perform and may be of limited value. The table set forth above, however, relates solely to tax revenues and projected foregone tax revenues attributable to the Catalyst Projects (and the assessed values attributable thereto); because such assessed values are assumed to be based on construction costs of the Catalyst Projects (e.g. likely considered improvements to property which are not subject to the 15% limit on changes in fair market value), any increases in assessed values directly resulting from the Catalyst Projects should not be affected by the current state law limits. Notwithstanding the foregoing, no assurance can be given by the City as to the actual changes in assessed values for properties within the CRRD or the ultimate effect of state law (whether in current form or as may be changed in the future) as it may relate to assessed values, real property taxes or the ability of local governments to fund their operations and other governmental purposes.

In summary, the City believes that the proposed redevelopment projects contemplated by this Redevelopment Plan will have no effect on the current real property tax revenues of the taxing districts which levy taxes on property located in the CRRD. All local governments will receive new revenues resulting from property taxes on new personal property investments and from the growth of real estate values outside the CRRD. All tax districts which consent to the Redevelopment Plan will forgo a small portion of their future revenue growth for a period of time. In return, all will benefit from a stronger, more diverse tax base and economy, improved roads, utilities and other infrastructure, and a more attractive community.

CHAPTER 9 – DISPLACEMENT IMPACT

The acquisition of both residential and business properties may be necessary to provide roadway improvements, utility system improvements, public facilities, walkways, parks and other public improvements in the CRRD. In some cases an acquisition may cause a business or resident to be relocated from their present location. Based on current expectations contemplated in the CRRD, the overall displacement impact is expected to be very minimal. The Catalyst Projects are projected to create new residences and businesses, but presently are not expected to result in the relocation of residents and businesses as outline in the following procedures.

However, should there be temporary or permanent displacement of residents as a result of the projects funded by public investment described above, the following procedures are expected to be followed. First, any cost of acquiring property and relocating residence and businesses will result in property owners receiving fair market value for their property as determined by two appraisals. Second, residences and businesses that are displaced will be eligible to receive moving expenses and payment for tenant improvements that cannot be moved. Third, the City has extensive experience with the relocation of persons displaced by public projects. City staff is extremely familiar with and is prepared to follow all requirements of public law 91-646, “Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 as Amended” and South Carolina Code Section 28-11-10 “Relocation Assistance”. The general steps that will be followed are:

1. After the public hearing regarding this redevelopment plan, City staff will assemble those affected by the redevelopment projects, distribute literature on the relocation process, provide a general explanation of individual’s rights under public law, and schedule individual meetings to discuss details specific to each person.
2. Conduct appraisals on properties to be acquired; and begin the acquisition process.
3. Complete a profile on each property owner/tenant and structure.
4. Conduct a survey of properties available in the vicinity of the projects; and contact realtors and create a bank of comparable properties that are available.
5. Work directly with each property owner/tenant in locating a selecting a comparable location based on profile; and have the City Inspection Division verify that the new structure is safe, decent and sanitary and in compliance with all City building codes.
6. Prepare paperwork required to validate relocation assistance payment, provide assistance to minimize impact of the move, and assist with preparation of the claim for a relocation payment.
7. Acquire property from the owners.
8. Provide assistance to each property owner/tenant in moving to a new location; and upon completion of move, make moving assistance payment.

Appendix A

SUMMARY

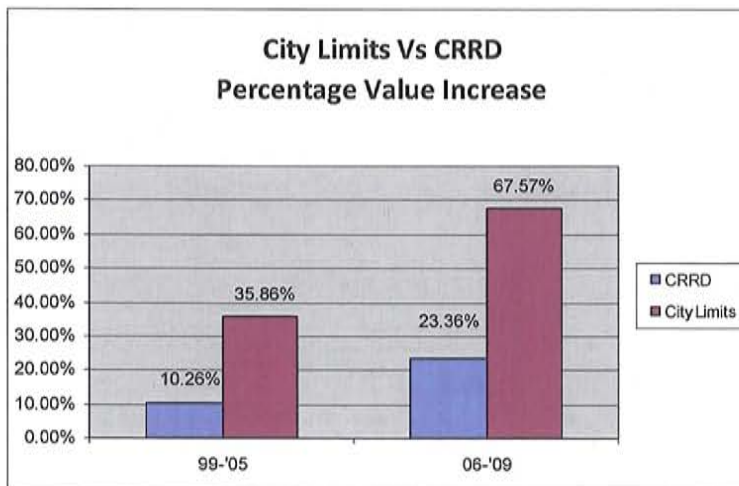

COLUMBIA RENAISSANCE REDEVELOPMENT DISTRICT

This Appendix provides additional information regarding the Catalyst Projects. References are made to other parts of this Redevelopment Plan for a statement of assumptions and limitations applicable hereto. All dollar amounts included are estimated values.

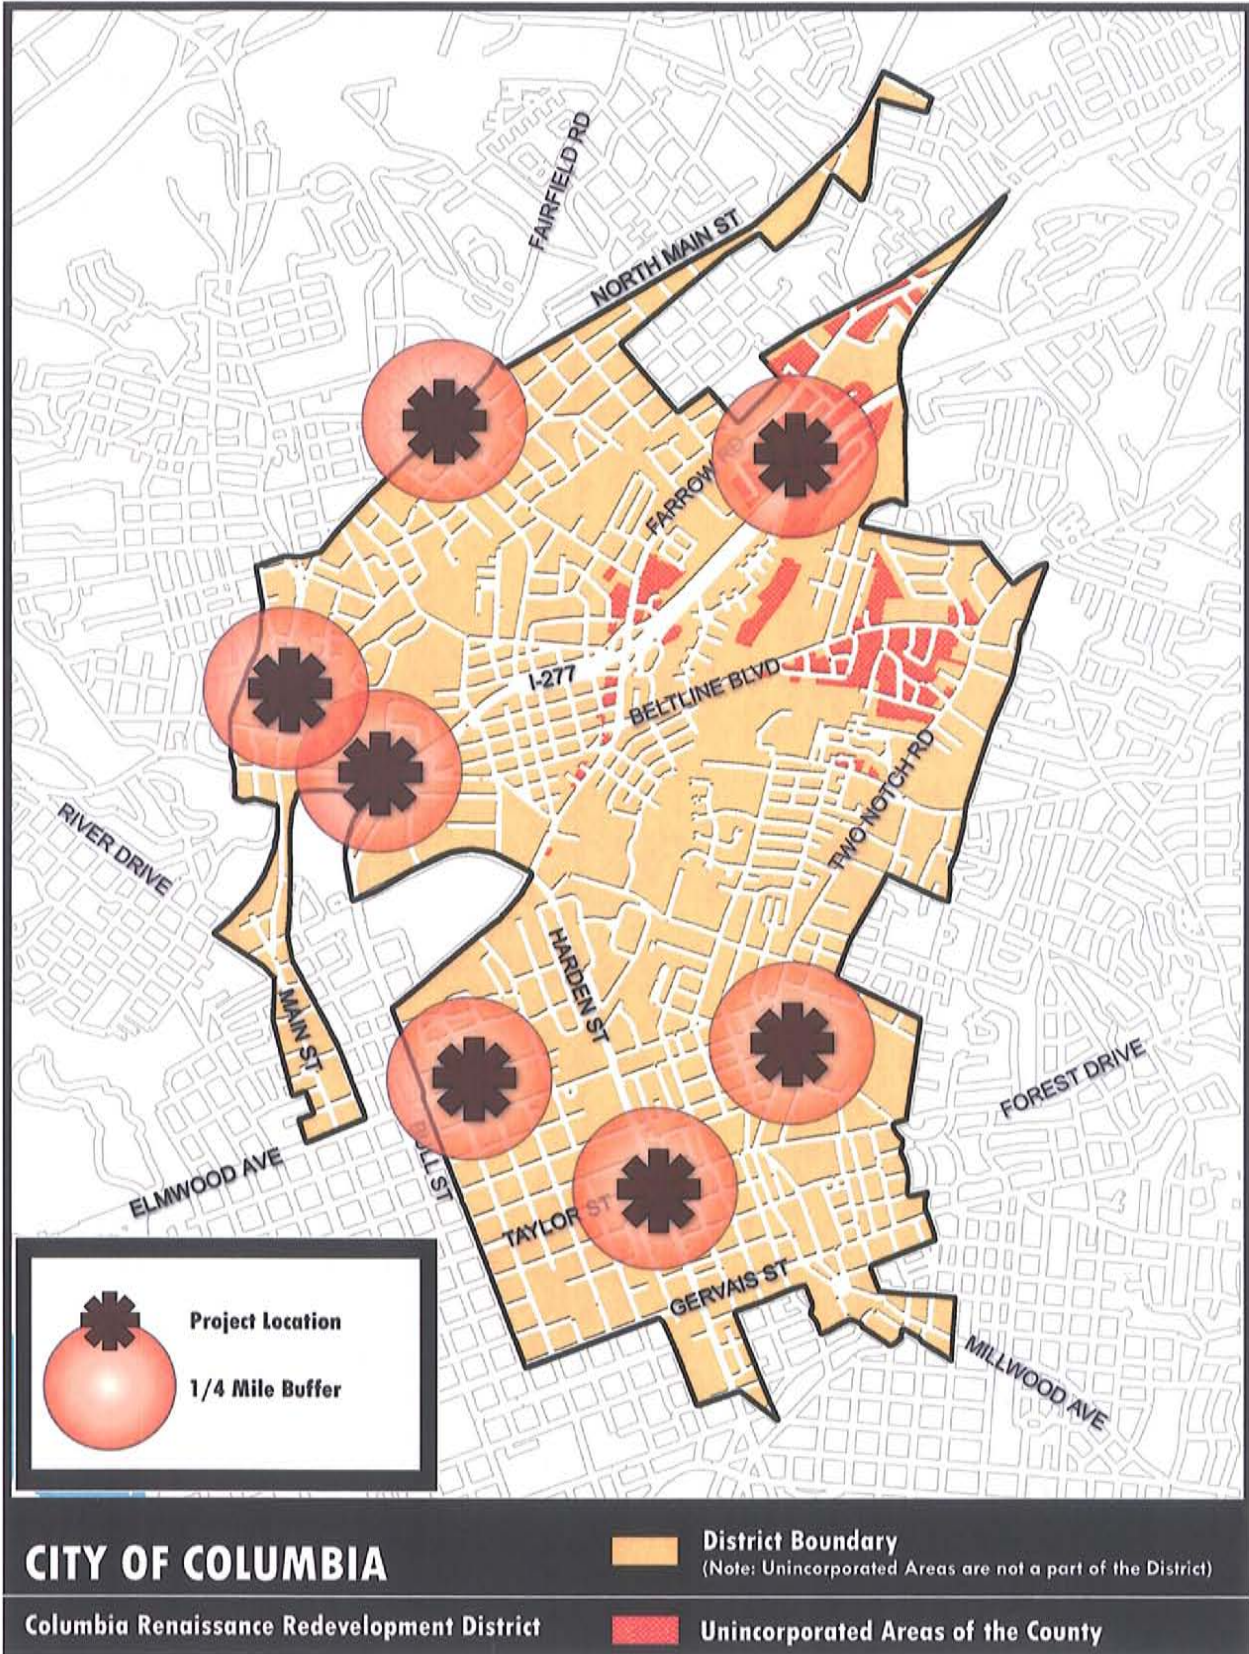

- **Location.** The 5.7 square mile study area has the general boundaries of Bull Street and North Main Street to the North and West, Farrow Road and Two Notch Road to the East, and Gervais Street on the South. Within the study area, the plan identifies several key characteristics indicating blight. The plan also identified key demographic characteristics of the area reflecting the vulnerabilities of the district when compared to the metropolitan area.
- **Current Assessed Value; Projected Assessed Value at Build-Out.** The current assessed value of the taxable real property within the CRRD (based on 2009 data) is \$31,595,500. The projected assessed value of the taxable real property within the CRRD at build-out of projected private development is \$54,140,902, an increase of approximately \$22.5 million.
- **Projected Incremental Taxes.** Assuming full participation of all taxing entities, stable millage rates, and equal annual growth in assessed value, the value of estimated annual incremental tax revenues after build-out within the CRRD is approximately \$6 million. This is an annual return on investment of 15% on the \$40,000 invested through the TIF.
- **Projects.** A description of the proposed redevelopment projects is contained in the CRRD Plan. These projects build on the North Columbia Master Plan and the East Central Master Plan, both of which the City of Columbia has prepared and is ready to execute. To help implement the goals, the plan identifies seven catalyst projects (the "Catalyst Projects") in the study area. The projects are mixed-use in nature and reflect a public/private partnership, with the City providing the necessary public infrastructure. The seven sites focus on tax exempt commercial property that is either vacant or blighted and will not result in the displacement of residents. It should also be noted that the Catalyst Projects listed in the two master plans are expected to be jumpstarted as a result of the CRRD projects being completed.
- **Costs; Obligations.** The total expected cost of the redevelopment projects and the Catalyst Projects, in current dollars, is approximately \$490 million. The CRRD Plan proposes that the City may approve, by future action, the issuance of obligations in an aggregate principal amount of not exceeding \$40 million. To the extent funds are secured from other sources to pay for the indicated public infrastructure, this will reduce the amount which might otherwise be funded with obligations.
- **Economic Impact.** In general terms, the Catalyst Projects will have short-term impact of providing jobs during the construction phase. Long-term, the projects will have multiple impacts on the study area, including permanent job creation, providing additional housing opportunities, providing local retail and services for the community, improving the appearance and character of the area, and enhancing the community culture. The CRRD is projected to create over 8,700

direct and indirect jobs within the area. This estimate is conservative, but could increase as economic conditions improve and future development increases.

- Phasing.** The business and community leaders involved in the development of the CRRD propose that the obligations, if and when issued, will be phased such that the maximum potential private development is encouraged on an incremental basis.
- Prior Work Associated with the CRRD.** The City of Columbia recognizes that private/public partnerships are necessary for the redevelopment of the CRRD. In planning, the CRRD was meant to provide an incentive to private developers and investors who might not otherwise identify areas of the CRRD for potential development. The City of Columbia not only envisioned partnerships with private developers, but also with other leading entities of the community such as Benedict College, Columbia College, Allen University, and Palmetto Health Richland. These partnerships have been realized through the creation of the CRRD.
- Assessed values for Columbia City Limits vs. the CRRD.** The charts below represent the growth comparisons between the corporate limits of Columbia and the CRRD, which is 5.7 square miles. These charts clearly show the lagging growth of the CRRD compared with the rest of the city. The CRRD has little financial impact on the taxing districts in its current state, but with TIF investment could make a significant financial contribution to the taxing entities.

The following shows the geographic boundaries of the CRRD and the locations of the Catalyst Projects described hereto.

DESCRIPTIONS OF CATALYST PROJECTS

Included in this section are 7 projects that are planned for development within the Columbia Renaissance Redevelopment District. The focus of the descriptions is the nature of the project, project costs, economic impact to the community, job creation projections, and the impact in tax revenues to the taxing districts.

In addition to the assumptions and limitations described in other parts of this Redevelopment Plan, the following are assumptions that were made in determining the tax revenues:

1. Assumes no change in millage from the beginning of the plan through the completion of construction.
2. In calculating the taxes generated after build out, property tax credits (i.e. Homestead, local option sales tax credit) were not taken into consideration. Also, the said numbers assume a 100% collection rate. This means that 100% of the levied millage is shown in the tables.
3. The operational millage for School District No. 1 of Richland County is only applied to commercial property. However, the bond millage for School District No. 1 of Richland County would be applied to both commercial and residential property.
4. Commercial property is assessed at 6% and residential property is assessed at 4%.
5. Future assessed values of the properties were calculated by using the current agricultural land value plus the cost of vertical construction. The proper assessment for residential and commercial property is then applied to the sum of the land value and vertical construction costs. If the current value of the land is unknown, then only the cost of the vertical build-out is used for the future property value.

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 1

PROJECT NAME:

Sunset Hotel Development

PROJECT DESCRIPTION:

This project will be an 81-room MainStay Suites hotel located at 1301 Sunset Drive. This is an extended stay hotel with rooms that provide home-like amenities, such as a full refrigerator, an oven with a two-eye stove top, microwave, and full sink. This hotel will sit on 2.82 acres of land and the building will be 56,000 square feet in size and provide a walking trail to complement the natural flowing creek that runs along the property.

DEVELOPER:

Columbia Empowerment Zone, Inc.; Lexington Hospitality

COST BREAKDOWN:

Construction	\$ 4,500,000
Landscaping	40,000
Site Work	1,160,000
Land	350,000
Contingency	50,000
Soft Costs (eng. & arch.)	549,700
Total Project Cost	\$ 6,649,700

ECONOMIC IMPACT

As part of a much larger master plan, this project was planned with the idea of spurring more private investment, eliminating blight, and improving the overall look and character of this area. With the medical park development across the street and Palmetto Health Richland approximately 100 yards away, this development will be the catalyst to inviting more retail and restaurant oriented businesses into the area providing even more jobs for local residents. Once completed, this hotel will immediately provide over 27 jobs to local residents of the North Columbia community and further contributing to the overall revitalization of the area.

In addition, this hotel development aims to provide a connection between the western and eastern sides of I-277. This will provide increased traffic to the business located on the eastern side of I-277 such as Subway, BJ's Café, and the recently built Sandhills Pediatric Office.

Currently, this property is a wooded area that lacks characteristics for possible public use. The neighboring vacant commercial property west of the site was formerly a Sam's Wholesale Club. After the completion of the hotel, this will be a more vibrant area making it more attractive to national retailers and private developers and resulting in an increased tax base for all taxing districts and ultimately making the neighboring property more attractive for a jumbo retailer, such as Wal-Mart, Target, or Walgreens further improving this corridor economically.

TIF INVESTMENT: \$2 million

TIF investment will be used for the following:

- Earthwork
- Sidewalks and Paving
- Storm Drain System
- Erosion Control
- Water
- Sewer
- Street Lighting
- Landscaping

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 2

PROJECT NAME:

North Main Development

PROJECT DESCRIPTION:

This project encompasses a compilation of goals and tasks. The first two phases of the North Main Plaza have been completed and the final two phases are now ready for development. Phase IV is located at the corner of North Main and Miller Avenue and will consist of a 4500 square foot national franchise restaurant. The restaurant will be a neighborhood grill and bar with a signature family-style atmosphere. This site consists of 2.35 acres of land that will be shared with a retail establishment directly next door on phase III. The negotiations with a national franchise are underway for phase III, which will be a 9,000 square foot multi-tenant building.

The additional milestones for the North Main Development involve the systematic acquisition of surrounding blighted properties of the North Main Plaza. The goal is to purchase these properties over the course of the next 6 to 10 years and provide a platform for new commercial and retail vibrancy for the North Main area, thereby removing the blight and creating a destination point in north Columbia.

DEVELOPER:

Columbia Empowerment Zone, Inc.

COST BREAKDOWN:

Construction	\$ 750,000
Equipment	75,000
Mobilization	10,000
Demolition	17,300
Site Work	287,788
Storm Drain System	44,009
Erosion Control	6,975
On Site Water Distribution	25,718
Sanitary Sewer	61,815
Landscape	100,000
Outdoor Lighting	80,000
Contingency	218,791
Other Land Acquisition	5,000,000
Total Project Cost	\$ 6,667,396

ECONOMIC IMPACT

The phase III and IV developments of the North Main Plaza will immediately create in excess of 60 jobs for the Eau Claire community. Together, these two phases will complete the development of the North Main Plaza. One objective for the North Main Plaza is to provide an atmosphere for families to shop and dine, which has been desired by residents of Eau Claire for several years. Another objective is to reduce the major problem of leakage of consumer spending outside of North Columbia due to residents having to leave this community to find similar retail stores and restaurants not found in Eau Claire. Recapturing these dollars and attracting national franchises and local customers outside of Eau Claire will help with the long-term goal of creating more jobs for the residents of this community.

Another major phase of the North Main development is to remove surrounding blight and increase attraction from national retailers significantly increasing the likelihood of future private investment. The abundance of vacant and abandoned property is currently prohibiting private developers and national franchises from considering the North Main area as a destination point. The ability to purchase these abandoned properties will allow for the opportunity to bring vibrant businesses that otherwise would not have considered having a presence on North Main.

TIF INVESTMENT: \$6 million

TIF investment will be used for the following:

- Property Acquisition
- Demolition
- Earthwork
- Sidewalks and Paving
- Storm Drain System
- Erosion Control
- Water
- Sewer
- Street Lighting
- Landscaping
- Tactical Wireless Video/Audio Surveillance system
- Broadband Wireless
- Wi-Fi, WiMAX

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 3

PROJECT NAME:

Senior Matters

PROJECT DESCRIPTION:

This will be an open living community for seniors and physically challenged individuals. This is located at 5406 Farrow Road and will consist of a 245,154 square foot building with onsite amenities for residents such as swimming pool, convenience store, pharmacy, medical staff, and rooms with fully equipped kitchens. The residents of this facility will be Veterans as rehabilitation patients and seniors.

DEVELOPER:

Senior Matters; Monticello Capital; Bobbitt Design Build

COST BREAKDOWN:

Construction	\$ 37,698,385
Site Work	1,350,000
Land	378,600
Soft Costs (eng. & arch.)	1,928,000
Total Project Cost	\$ 41,354,985

ECONOMIC IMPACT

For years Farrow Road has been on the verge of redevelopment. The property was made available, but the investors and developers wanting to invest in this area were non-existent. Senior Matters' concept was a great fit for the 9.90 acres. The land was cleared several years ago and now sits vacant constantly having to be cleared of trash and garbage and grass regularly mowed. The Senior Matters project will not only be a local hub, but a national destination point for veterans needing assisted living or rehabilitation because of its innovative concepts and services for veterans. This will help to bring a national attention to Columbia and helping the city to become more economically viable.

TIF INVESTMENT: \$1.35 million

TIF investment will be used for the following:

- public water, sewer, electrical, and stormwater systems
- street improvements
- landscaping
- street lighting
- sidewalks
- street signage
- other site work and preparation

IMPACT ON TAXING DISTRICTS:

TIF Investment:	\$ 1,350,000
Private Investment:	\$37,698,385 (construction)
Land Value:	\$ 378,600
Current Assessment:	\$ 0
Future Assessment:	\$ 1,943,937 (50% commercial, 50% residential)

* School District operational millage not levied on owner-occupied residential property

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 4

PROJECT NAME:

Allen University Mixed Use Development

PROJECT DESCRIPTION:

This will be a 48,064 square foot mixed business and residential development with retail space on the first level. The upper levels will consist of three floors with ten four-bedroom apartment style suites on each level. This development will be located at the Northwest corner of Hampton and Harden Streets.

Allen University will enter a joint venture with a private developer to improve and build residential and retail shops on properties bordering Hampton and Harden Streets. Currently there are two vacant buildings, one building used as a hotel, and one smaller building being used for public weekly gatherings by religious groups. Allen University proposes to purchase the vacant buildings and the poorly maintained hotel.

The first level of the project will consist of three retail shops, including a cell phone store, an eatery, and an internet café. Additionally, Allen University owns the historic African American theater building, which was used in the 1940s and 50s for African American theater patrons. This historic African American theater will be renovated and restored to be used as a fine arts center for gatherings of 300-400 people.

DEVELOPER:

Allen University; Reginald Barnes

COST BREAKDOWN:

Construction	\$ 4,394,060
Site Work	1,500,000
Land Cost	733,000
Total Project Cost	\$ 6,627,060

ECONOMIC IMPACT

The financial impacts of this proposed project are numerous. In addition to improving the visual appeal of the entire block of Harden and Hampton Streets to match the improvements already in place on the corner of Harden and Taylor, this project will prove fiscally sound for the University and the city of Columbia and its residents. The historic African American theater will attract visitors and/or tourists, which in turn brings people to the city and the community.

The overall development will also provide extensive job creation. This project will require the employment of subcontractors, plumbers, electricians, and general construction workers. The proposed retail space will create approximately 60 permanent jobs through shop and theater employees, residential assistants, building managers, maintenance personnel, and security. The majority of the subject properties are tax exempt and the resulting multi-million dollar project improvement will result in an immediate boost to the tax base.

TIF INVESTMENT: \$1.5 million

TIF investment will be used for the following:

- Public Water, Sewer, Electrical, and Stormwater Systems
- Property Acquisition
- Street Improvements
- Demolition
- Landscaping
- Street Lighting
- Sidewalks
- Street Signage
- Other Site Work and Preparation

IMPACT ON TAXING DISTRICTS:

TIF Investment: \$1,500,000
 Private Investment: \$4,394,060 (construction)
 Land Value: \$ 436,500
 Current Assessment: \$ 53,110
 Future Assessment: \$ 219,702 (50% commercial, 50% residential)

<u>Taxing District</u>	<u>Current Taxes</u>	<u>Taxes After Build</u>
Richland County (90.8)	\$ 4,822	\$19,949

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 5

PROJECT NAME:

Columbia College

PROJECT DESCRIPTION:

This project is a part of the North Columbia Master Plan Catalyst Projects. This is a mixed-use development of approximately 1.6 acres at the intersection of North Main and Columbia College Drive. The first phase will include twenty four 1,100 square foot two bedroom residential units on the ground, second, and third floors. The ground floor will also include approximately 4,100 square feet of retail space. Phase II will include an additional two-story building will include 8 two bedroom residential units of approximately 1,100 square feet each. Phase III will include 32 two-bedroom units with 4,100 gross square feet of ground floor retail space.

DEVELOPER:

Columbia College

COST BREAKDOWN:

Construction	\$ 3,838,560
Site Work	150,000
Municipal Costs	135,000
Soft Costs (eng. & arch.)	215,000
Construction Financing Costs	924,704
Total Project Cost	\$ 5,363,264

ECONOMIC IMPACT

This development will provide much needed services to both residents and students. There is a large, untapped economic market associated with Columbia College. With 1,300 students, staff of 200 and a growing evening course curriculum, the retail services surrounding the college are not reflective of the needs of the area.

The North Columbia Master Plan calls for redevelopment directly associated with this intersection to provide a mix of retail and restaurant services as well as housing to meet the demand of the student population as well as the residents. It states that this area does not have adequate retail services, which hampers the efforts in attracting potential new residents. This

project will be the initial drive towards overcoming that obstacle. It will also bring Columbia closer to achieving its goal of creating a more vibrant North Columbia and making the campus more attractive to potential students.

TIF INVESTMENT: \$1.5 million

TIF investment will be used for the following:

- Public Water, Sewer, Electrical, and Stormwater Systems
- Property Acquisition
- Street Improvements
- Landscaping
- Street Lighting
- Sidewalks
- Street Signage
- Other Site Work and Preparation

IMPACT ON TAXING DISTRICTS:

TIF Investment:	\$1,500,000
Private Investment:	\$3,838,560 (construction)
Land Value:	\$ 105,300
Current Assessment:	\$ 0
Future Assessment:	\$ 197,193 (50% commercial, 50% residential)

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 6

PROJECT NAME:

Wellness Center at Two Notch Road

PROJECT DESCRIPTION:

This is a planned 99,871 square foot building sitting on 3.32 acres of land sitting at 2000 Two Notch Road. This development will consist of 4 stories of medical office/medical technology space (66,900 sqft) and retail with penthouse restaurant space (32,966 sqft). The building will be designed with LEED Gold Certification.60,000 square feet of medical office space, 10,000 square feet of retail space and a 5,000 square foot restaurant.

DEVELOPER:

Benedict College; Harris+Smith, LLC

COST BREAKDOWN:

Construction	\$ 9,993,061
Infrastructure	1,500,000
Tenant Improvements	2,479,470
Land	500,000
Soft Costs, Interest & Fees	4,300,530
Total Project Cost	\$ 18,773,061

ECONOMIC IMPACT

This project is expected to generate significant economic impact along the Two Notch Road corridor and surrounding communities. Up to 450 construction and temporary jobs will be created and a projected 60 permanent jobs will be created once construction is complete. It is expected that Providence Hospital and Benedict College will occupy significant space within the facility to house physicians’ practices and the college’s allied health training program.

The addition of supportive retail (i.e. convenience store, video rental, quick service restaurant, coffee shop, and family themed restaurant) will address the needs identified in the surrounding community through a retail study completed by ERA.

TIF INVESTMENT: \$2 million

TIF investment will be used for the following:

- Public Water, Sewer, Electrical, and Stormwater Systems
- Street Improvements
- Landscaping
- Street Lighting
- Sidewalks
- Street Signage
- Other Site Work and Preparation

IMPACT ON TAXING DISTRICTS

COLUMBIA RENNAISSANCE REDEVELOPMENT DISTRICT

Project Description # 7

PROJECT NAME:

Bull Street Development

PROJECT DESCRIPTION:

This is a major development for Columbia. The Bull Street property, currently the State Mental Health Department, is 181 acres in size and is the largest parcel of land that is available in Columbia. The development planned for this property is a mix of new residential and commercial construction that is sure to revitalize downtown Columbia.

This plan will include 1,243 residential dwelling units, including apartment/condominium units, townhomes, and single family homes of a variety of sizes and levels of affordability. In addition the plan incorporates approximately 500,000 square feet of commercial and office areas and a 160-room hotel. The plan also includes a church, hiking and bike trails, recreational spaces, community facilities, and major off-site roadway improvements.

DEVELOPER:

COST BREAKDOWN:

Construction	\$388,700,000
Site Preparation	15,037,767
Infrastructure (Utilities)	2,840,194
Infrastructure (public roads)	4,118,004
Infrastructure (pond and stream)	4,371,432
Land Cost	30,000,000
Total Project Cost	\$445,067,397

ECONOMIC IMPACT

This will be the largest development project in downtown Columbia and will by far have the most impact on the downtown economy. The ongoing construction is projected to provide over

1,500 jobs for construction workers, and in total, will create 2,600 direct and indirect jobs for the Columbia area.

Once the initial residential phases are completed, the downtown businesses will thrive from the increase in residents that live, work, and play downtown. In terms of an immediate financial impact on the tax base, this property is currently tax exempt, and once sold, will provide an immediate boost in taxes.

This property currently contains old and abandoned buildings that are of significant historical importance, but are not providing any public benefit. This property development will result in several of these buildings being renovated to retain their historical status, while new buildings and houses are developed to bring a modern, but complementary aesthetic.

While downtown Columbia, specifically Main Street, has focused on recruiting more retail components for a more urban feel, the Bull Street project will help to bring vibrancy back to downtown Columbia. With the increase in residents, more national retailers will be able to quantify the demand and will now see downtown Columbia as a viable option for a location, thus creating even more jobs.

TIF INVESTMENT: \$20 million

TIF investment will be used for the following:

- Earthwork and Erosion Control
- Site Lighting
- Landscaping
- Water
- Sewer
- Power/Gas/Communications
- Paving and Storm Drainage
- Stormwater Ponds and Piping
- Asbestos Abatement and Demolition

IMPACT ON TAXING DISTRICTS

NOTICE OF ADOPTION BY THE CITY OF COLUMBIA OF AN ORDINANCE
APPROVING THE COLUMBIA RENAISSANCE REDEVELOPMENT PLAN

NOTICE IS HEREBY GIVEN that the City Council of the City of Columbia, South Carolina, on February 17, 2010, enacted Ordinance No. 2010-032 (the "Ordinance") entitled:

"AN ORDINANCE APPROVING THE COLUMBIA RENAISSANCE REDEVELOPMENT PLAN OF THE CITY OF COLUMBIA, SOUTH CAROLINA; DESIGNATING SUCH AREA AS A REDEVELOPMENT PROJECT AREA; MAKING FINDINGS OF BLIGHT WITHIN THE REDEVELOPMENT PROJECT AREA AND OTHER FINDINGS CONTEMPLATED BY THE TAX INCREMENT FINANCING LAW; DESIGNATING REDEVELOPMENT PROJECTS; AND OTHER MATTERS RELATING THERETO."

The Ordinance approved the Columbia Renaissance Redevelopment Plan (the "Redevelopment Plan") and designated certain areas of the City as a "redevelopment project area" as described in the Ordinance and the Redevelopment Plan. Copies of the Ordinance and the Redevelopment Plan are available during normal business hours in the offices of the City: City Clerk, 1737 Main Street, Columbia, South Carolina 29217-0147.

This Notice is given pursuant to the provisions of Sections 31-6-10 to 31-6-120, South Carolina Code of Laws 1976, as amended (known as the Tax Increment Financing Law).

Notice is further given that any interested party may, within 20 days after the publication of this Notice of Adoption by the City of Columbia of an Ordinance Approving the Columbia Renaissance Redevelopment Plan, but not afterwards, challenge the validity of the adoption of the Ordinance and the Redevelopment Plan by action de novo in the Court of Common Pleas in Richland County.

CITY OF COLUMBIA, SOUTH CAROLINA
